Safe Streets for All

Transportation Safety Action Plan

SAINT PAUL
PUBLIC WORKS

Join us for a virtual meeting!

Wednesday, Dec. 9
5:30 p.m. - 6:30 p.m.

Learn about the finalized plan at stpaul.gov/transportationsafetyplan

bit.ly/TSAP-virtual

The City's goal is to reduce and eliminate traffic fatalities and injuries for everyone in Saint Paul.

Pedestrians *Bicyclists* *Transit users* *Drivers*

Project overview

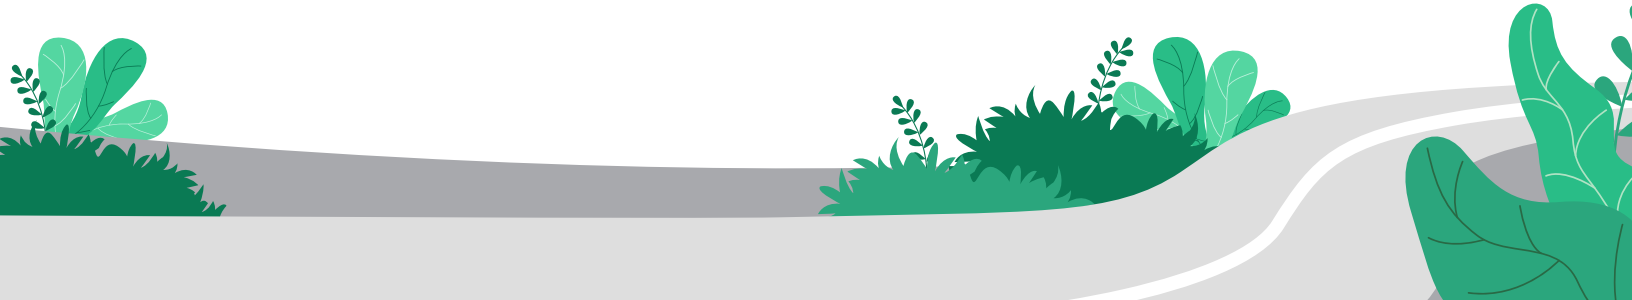
Saint Paul is now finished with the **Safe Streets for All: Transportation Safety Action Plan.** The plan analyzes vehicle crash data, travel patterns, and safety concerns in the city with the goal of stopping serious injuries and deaths involving vehicles.

With the help of community input, the plan centers Saint Paul residents who are most impacted by traffic-related danger including; pedestrians, bicyclists, and people in historically underserved communities.

Findings from the plan support future funding opportunities for roadway and infrastructure safety projects.

Why this matters

The actions and projects identified in this plan will help eliminate traffic crashes and address issues like reckless and distracted driving and high traffic speeds.



Project goals

- Adopt a Transportation Safety Action Plan to prioritize transportation safety projects identified by Saint Paul residents.
- Apply for, accept, and implement Federal Safe Streets for All transportation safety grant.
- Determine physical infrastructure projects, strategies, and policies that address and reduce traffic crashes.
- Improve how the City selects and designs future projects that improve transportation safety.

A safer Saint Paul for all

This plan will support the City's goals to:

- Secure funding for future safety projects that reduce traffic fatalities and injuries, advancing the City's focus on transportation safety.
- Center equity in planning to include historically excluded communities of color to create a safer and more equitable transportation system.
- Help the City to develop projects that improve transportation safety, and insert safety elements routinely into more projects across Saint Paul.
