RE: Review of the *Hamline Midway Community Plan* and Initiation of a Zoning Study

Background:

Several years ago, the Hamline Midway Coalition (HMC) drafted and adopted a new district plan. This plan was completed without input from PED staff and without the use of guidelines or other tools for plan development provided by PED staff for neighborhood plan development. Among other things, the plan calls for consideration of several potential rezonings with District 11.

The *Hamline Midway Community Plan*:

The *Hamline Midway Community Plan*, included in your packets, is a summary plan document developed by PED staff in conjunction with the Hamline Midway Coalition. The summary plan gives a brief overview of the overall vision for the plan and the goals of each of the plan chapters adopted by the HMC board, and lists the key policies necessary to achieve those goals. Chapters include Land Use, Transportation, Housing, Environment, and Historic Preservation.

The plan is intended to help support implementation of the *Saint Paul Comprehensive Plan* at the neighborhood level and to document neighborhood priorities, including as they relate to City planning and administrative processes. The Hamline Midway Coalition will use the summary plan in conjunction with the full plan previously adopted by the HMC Board.

Zoning Study Request:

In the Land Use Chapter and Appendix A, the plan identifies a number of potential zoning changes to help further transit-oriented development and ensure a scale and character of future development appropriate to the neighborhood. These proposed changes, along with recent conversations among PED staff, HMC representatives, and the Ward 4 office would serve as the starting point for the study. The primary focus of the zoning study would be on commercial area along Snelling and at several key nodes in the neighborhood. In addition, the study will look at the potential for moving from residential to mixed-use zoning designations at several potential redevelopment locations. The Hamline Midway Coalition is also requesting consideration of changes to residential zoning along a stretch of Thomas Avenue.

Memo to Planning Commission

December 20, 2013

Page 2

Recommendation:

Staff recommends:

- 1) That the Planning Commission release the *Hamline Midway Community Plan* for public comment and set a public hearing date of February 7th, 2014.
- 2) That the Planning Commission initiate a study to consider rezoning various districts within the Hamline Midway neighborhood.

Resolution to Initiate District 11 Hamline Midway Zoning Study

WHEREAS, the *Hamline Midway Community Plan*, a proposed addendum to the Saint Paul Comprehensive Plan, has been released for public comment and a hearing before the Planning Commission set for February 7th, 2014; and

WHEREAS, the *Hamline Midway Community Plan* proposes rezoning of properties along portions of Snelling, Hamline, and Thomas Avenues; and

WHEREAS, the Hamline Midway Coalition more generally envisions Hamline and Snelling Avenues as vibrant pedestrian- and transit-oriented, mixed use corridors connecting the Green Line LRT to the neighborhood to the north; and

WHEREAS, the future land use map of the Saint Paul Comprehensive Plan identifies Hamline Avenue north from University Avenue north to Pierce Butler Route as a Residential Corridor and Snelling Avenue from University north to Pierce Butler Route as a Mixed Use Corridor; and

WHEREAS, Hamline Avenue from University Avenue north to Pierce Butler Route is currently a mix of T2 Traditional Neighborhood, R4 One Family Residential, B1 Local Business, B2 Community Business, and RM2 and RM3 Multifamily Residential zoning districts; and

WHEREAS, Snelling Avenue from Thomas Avenue north to Pierce Butler Route is currently a mix of T2 Traditional Neighborhood, B2 Community Business, B3 General Business, and RTI Two-Family Residential zoning districts; and

WHEREAS, the current zoning of properties along the aforementioned stretches of Hamline and Snelling Avenues, as described herein, may inhibit the expansion and establishment of uses consistent with the future land use map of the Comprehensive Plan and the vision of the Hamline Midway Coalition; and

WHEREAS, the current residential zoning designations of large properties near the intersections of Thomas and Minnehaha Avenues with Snelling Avenue may similarly inhibit the future

moved by _____

against _____

development of an important Mixed Use Corridor; and

WHEREAS, Sec. 61.801(b) of the Zoning Code authorizes the Planning Commission to initiate an amendment to the Zoning Code as provided in Minnesota Statutes Sec. 462.357, Subd. 4;

NOW, THEREFORE, BE IT RESOLVED that the Saint Paul Planning Commission hereby initiates the District 11 Hamline Midway Mixed Use Corridors 40-Acre Zoning Study, for a study area generally defined as all blocks with street frontage on Snelling and Hamline Avenues between University Avenue and Pierce Butler Route, and all blocks with street frontage on Thomas and Minnehaha Avenues between Hamline and Snelling Avenues.

Hamline Midway Community Plan

An Addendum to the Saint Paul Comprehensive Plan

Hamline Midway Coalition (District 11) - District Boundaries

Hamline Midway Community Plan

An Addendum to the Saint Paul Comprehensive Plan - page 1

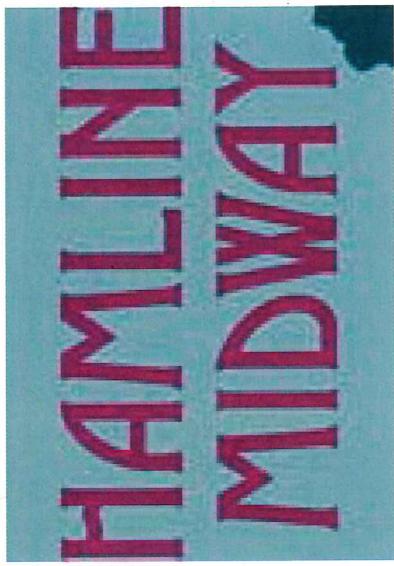

Purpose

The Hamline Midway neighborhood is bounded by Lexington Parkway on the east, University Avenue on the south, Transfer Road on the west, and on the north by the railroad tracks just north of Pierce Butler Route. The Hamline Midway Coalition (HMC) — District Council 11 — is a community-based non-profit organization dedicated to making the Hamline Midway neighborhood a better place to live, learn, work, and play.

The purpose of the Hamline Midway Community Plan is to help provide for implementation of the Saint Paul Comprehensive Plan at the community level, as well as to guide future programming and policy decisions for the Hamline Midway Coalition.

Overall Vision

This plan envisions Hamline Midway as a diverse, lively, well-designed urban neighborhood that respects its history while embracing the best of city life. This vision includes high-quality residential housing of various types and densities, aesthetically appealing mixed-use development, bustling transit-oriented commercial corridors, vibrant parks, gardens, and public open spaces, and a range of amenities including schools, churches, and shops. We envision a sustainable, livable neighborhood where residents maintain their older homes, walk and bike and use transit, have the opportunity to grow food, and nurture the urban forest. We see Hamline Midway as a great neighborhood to live, work, learn, and play, in the most livable city in America.

Land Use

Introduction

The Hamline Midway Community Plan seeks a diverse urban neighborhood that combines places to work, live, play, and shop in a well designed urban setting that respects neighborhood history and character. This includes high quality residential housing of diverse character and densities, aesthetically appealing mixed use development, transit-oriented corridors with commercial vitality, sustainable design, and public open spaces.

Land Use Objectives and Strategies

LU 1 Encourage better utilization of land through mixed-use options along commercial corridors, near neighborhood commercial corners, and near transit stops.

LU 1.1 Support zoning studies throughout the district to determine the appropriateness of rezoning areas from Business to Traditional Neighborhood.*

LU 1.2 Consider rezoning Snelling Avenue to Traditional Neighborhood.

LU 1.3 Identify redevelopment opportunities in the District, while promoting and prioritizing such sites to expedite their development.

LU 2 Encourage pedestrian-scale development that includes amenities such as landscaping, seating areas, screened parking, and public art.

LU 2.1 Promote active business store fronts with pedestrian-scale building facades, oriented toward public spaces and streets, including storefront transparency to provide safety and vitality.

LU 2.2 Encourage architecture that is coherent with surrounding architecture and incorporates utilitarian

features (e.g. loading docks, mechanical equipment, refuse bins, etc.) into the building design.

LU 3 Encourage the incorporation of multi-modal transportation options into all new development to accommodate pedestrians, cyclists, transit use, and vehicle sharing.

LU 3.1 Incorporate facilities promoting forms of transportation other than the automobile such as: bicycle storage and maintenance locations in new multifamily residential and commercial developments; heated bus shelters designed with new buildings; designated pedestrian walks that are clearly marked through commercial developments and parking lots.

LU 4 Encourage the creation of public spaces in new developments, especially along University and Snelling Avenues and at neighborhood commercial corners.

LU 5 Encourage appropriate transitions between disparate land uses.

LU 5.1 Support design standards for new developments that provide for a gradual transition between single-family housing and new buildings in terms of height, mass, scale, and architectural context.

* See full list of recommended zoning changes in Appendix A.

Hamline Midway Community Plan

Land Use

- LU 5.2 Promote the use of fencing, berthing, or other landscape techniques to buffer disparate land uses.
- LU 5.3 Encourage the use of pedestrian-scaled lighting to reduce the level of light output and minimize off-site glare.

LU 6 Encourage shared parking arrangements for commercial properties and neighborhood wide parking solutions.

LU 6.1 Unbundle the sale of parking spaces from housing units in multi-family housing developments.

LU 6.2 Discourage the establishment of parking lots as the primary use of a property.

LU 7 Promote "Green" or sustainable design in new development.

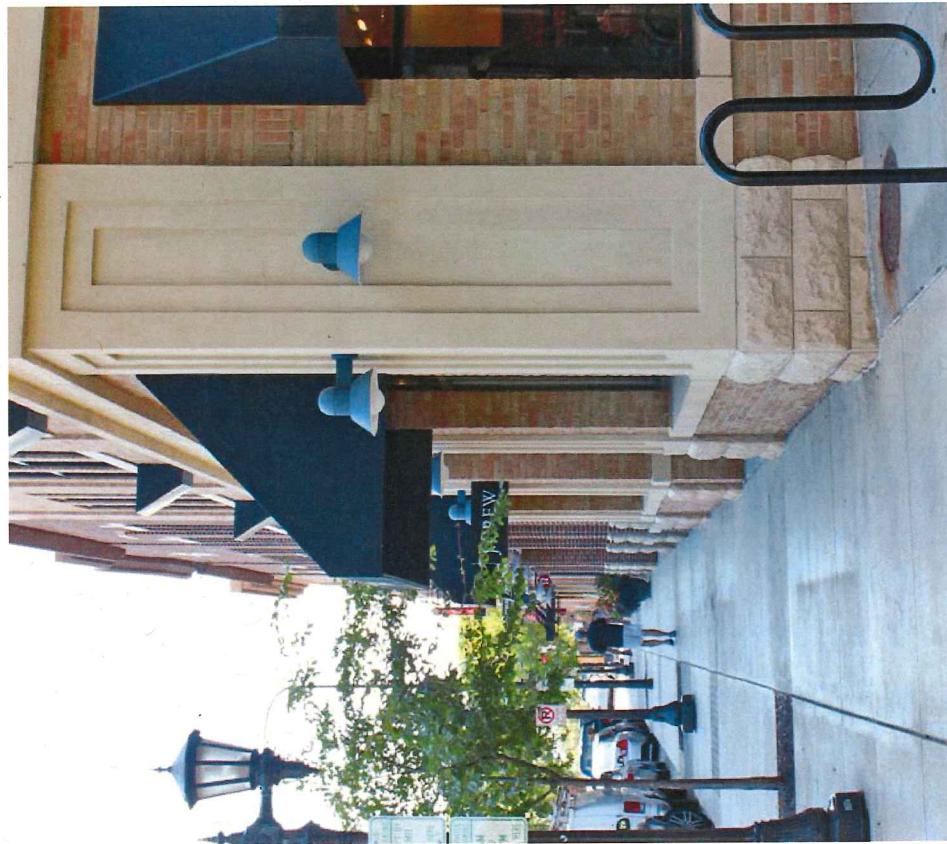

LU 7.1 Encourage developments to be built to specific sustainable design guidelines (e.g. Minnesota Sustainable Design Guide, or the United States Green Building Council's LEED standards).

LU 7.2 Incorporate storm-water runoff reduction techniques into new or re-developments.

LU 8 Encourage a greater range of housing types to meet a variety of needs in terms of household size, income, age/state in life-cycle, and ownership status.

LU 9 Develop neighborhood identity through neighborhood gateways that use public art, plantings, signs etc. at key neighborhood intersections.

- LU 10 Support West Midway Industrial Strategy.
 - LU 10.1 Support final adoption of findings and recommendations.
 - LU 10.2 Support redevelopment and reinvestment in industrial and job-producing land uses.

Hamline Midway Community Plan

Transportation

Introduction

The Hamline Midway Community Plan seeks a balanced transportation system that allows neighborhood residents to choose from a variety of transportation modes for their local, mid-range, and regional trips. To achieve this goal, this chapter identifies strategies to calm traffic, minimize large vehicle traffic through residential neighborhoods, support a strong and well-connected transit system, promote walking and bicycling, and support public realm investments to improve the pedestrian environment.

Transportation Objectives and Strategies

T1 Complete sidewalk network, improve street lighting, and work with utilities to remove poles obstructing sidewalks.

T2 Create safe routes to schools, parks, and libraries.

T3 Support traffic calming projects to address traffic speed and volume.

T4 Support pedestrian- and transit-friendly public realm improvements such as wayfinding, public art, placemaking, façade improvements, gardens, and systems for snow removal.

T5 Support the completion and expansion of the bicycle route network through a variety of bikeways, including striped lanes, signed routes, cycle tracks, bike boulevards, and off-street bike paths.

T6 Support future development of commuter rail, bus rapid transit, limited-stop bus lines, local route bus service, and other mass transit modes.

Hamline Midway Community Plan

Transportation

T7 Support pedestrian and bike access to LRT stations and bus service to LRT and BRT lines.

T8 Support and advocate for location of transit shelters at critical nodes in the system.

T9 Support shared parking agreements and structured parking where appropriate.

T10 Maintain current configuration of truck routes and support projects to limit cut-through truck traffic in residential areas, including through improved connections between regional routes and industrial areas.

T11 Advocate for northern alignment of the Red Rock Corridor and a Snelling Avenue station.*

T12 Study alternative uses of former Amtrak station.

T13 Support innovative solutions to conflicts between commercial vehicle traffic and residential uses in those areas where residential and commercial land use abut each other (e.g. the north side of University Avenue and the south side of Sherburne Avenue).

T14 Support neighborhood schools to minimize school bus traffic in the neighborhood and support thoughtful placement of charter schools to minimize the impact of bus traffic related to these schools.*

* Policies T11, T14, and T15 are representative solely of Hamline Midway Coalition identified priorities. Adoption of this plan by the City of Saint Paul does not constitute endorsement nor official or unofficial adoption of these policies.

Hamline Midway Community Plan

Environment

Introduction

The Hamline Midway Community Plan promotes the long-term health and well-being of the entire Hamline Midway community through sustainability, livability, and equity. This plan aims to reduce pollution, reduce the carbon footprint of the neighborhood, assure access to environmental resources, and promote changes in the design and use of the built environment.

Environment Objectives and Strategies

- E 1 Encourage best practices in stormwater management, especially for public facilities, and promote stormwater education.
- E 2 Support reduction of point and non-point air pollution emissions, including support for changes to the built environment that encourage walking, cycling, and other forms of transportation that eliminate or reduce emissions.
- E 3 Support prohibition on garbage burning as an energy source.*
- E 4 Support and promote maintenance of healthy urban forest on both private and public property.
- E 5 Work with railroad to address neighborhood noise concerns.
- E 6 Advocate for changes to the waste management system to minimize waste collection traffic, provide for safe disposal of hazardous and electronic waste, provide organics collection and support for composting, and provide for safe and easy disposal of large items, metals, construction debris, and other materials.*

* Policies E3 and E6 are representative solely of Hamline Midway Coalition identified priorities. Adoption of this plan by the City of Saint Paul does not constitute endorsement nor official or unofficial adoption of these policies.

Hamline Midway Community Plan

Environment

E7 Provide resources to homeowners for alternative energy and energy efficiency projects. 

E8 Encourage reduction of business energy use and development of new businesses focused on energy use reduction or alternative energy sources.  

E9 Support the development of a strong local foods systems including food production at community and home gardens, food preservation education, and local markets for locally produced foods.  

E10 Support home water supply testing and seek funding for lead water service and pipe replacement. 

E11 Encourage rain and gray-water harvesting for landscape use. 

E12 Advocate for park facilities to serve full spectrum of recreation needs regardless of age, disability status, geography, passive/active activities, or season. 

E13 Support projects to improve parks, the connectivity of urban green spaces, and tree diversity. 

E14 Discourage use of chemical treatment for weeds or pests. 

Housing

Introduction

The Hamline Midway Community Plan seeks high quality housing of diverse character and densities by encouraging maintenance and improvement of existing homes while embracing new higher-density housing development. This plan also envisions a healthy balance between owner-occupied and rental properties.

Housing Objectives and Strategies

- H 1. Encourage the maintenance and improvement of existing housing stock. 
 - H 1.1 Support funding assistance to help homeowners with housing maintenance, repairs, and remodeling.
 - H 1.2 Support targeted home remodeling programs that have a broad community impact and/or public health benefits (e.g. exterior repairs, lead window replacement, lead water line replacement, etc.).
 - H 1.3 Promote a contracting co-op where homeowners with similar repair needs can receive a volume discount by providing a certain amount of work to a contractor.
 - H 1.4 Explore and support efforts proactively address vacant residential properties. 
- H 2. Maintain sustainable rental opportunities.
 - H 2.1 Foster relationships between rental property owners and the neighborhood to improve the condition and aesthetic of properties.
 - H 2.2. Create a marketing strategy to promote the "Hamline-Midway" neighborhood on rental property listings. 
 - H 2.3 Explore senior housing options, such as a senior housing co-op or assisted living rental buildings. 
- H 3 Provide a variety of new housing options, particularly near the Green Line LRT.
 - H 3.1 Prioritize redevelopment on University Avenue and Snelling Avenue for high density housing or mix-used development that includes housing. Such development should be appropriate to an urban setting with an emphasis on transit-oriented design.
 - H 3.2 Encourage infill housing development on appropriate sites.
 - H 3.3 Encourage development that fill gaps in Saint Paul housing stock, such as larger rental units.

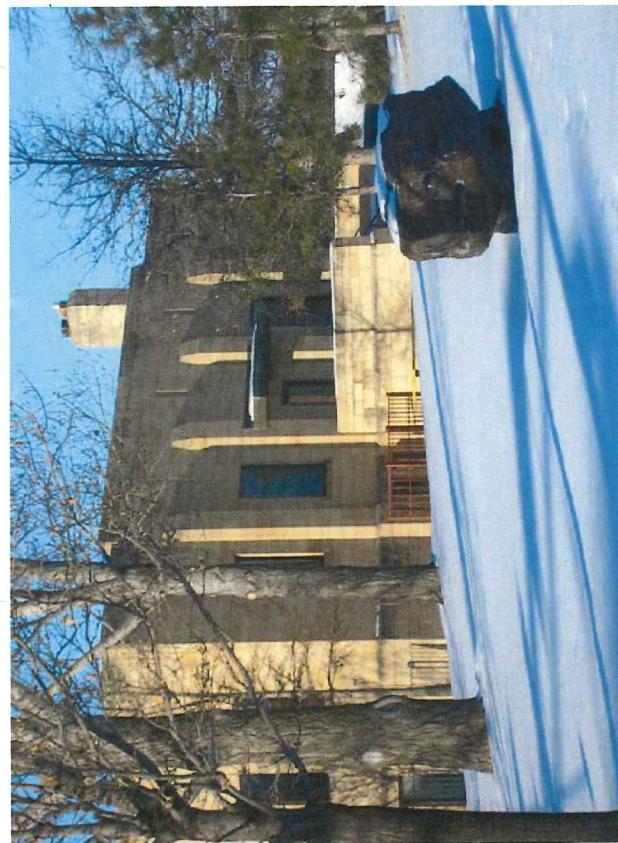

Historic Preservation

Introduction

The Hamline Midway Community Plan seeks to preserve the historic resources of the Hamline Midway neighborhood including its housing stock, churches, local businesses, and industries. These historic resources define and anchor the Hamline Midway, particularly along Snelling and University Avenue. Hamline Midway residents have long embraced the values of historic preservation by maintaining their properties, keeping obtrusive development to a minimum, and fighting for the retention of neighborhood landmarks. The Hamline Midway Community Plan also views historic preservation as a strategy for sustainability and an important economic development tool.

Historic Preservation Objectives and Strategies

- HP1 Facilitate neighborhood preservation activities through information and logistical support.
- HP2 Coordinate preservation activities between neighborhood groups, the City of Saint Paul, and preservation interest groups (e.g. Historic Saint Paul).
- HP3 Identify potential historic sites and districts in the neighborhood and develop local contexts for review.
- HP4 Encourage a repository for existing historical information; forward information on to other public repositories as appropriate.
- HP5 Work with city to educate property owners regarding affordable preservation, and develop strategies for private maintenance and improvement initiatives.
- HP6 Develop design guidelines for commercial and industrial development that are mindful of historic preservation.

DATE: December 12, 2013
TO: Planning Commission
FROM: Neighborhood Planning Committee
RE: Review of proposed text amendment initiated by Resolution 13-1906, amending the Zoning Code text regarding source-separated organics (Secs. 60.220 and 65.331)

ISSUE

Councilmember Russ Stark introduced Resolution 13-1906 on December 4, 2013, requesting the Planning Commission's study, report, and recommendation within 60 days regarding a proposed amendment of Zoning Code Secs. 60.220 and 65.331. The amendment would create a definition for "source-separated organics" and would allow collection and transfer of source-separated organics at municipal yard waste sites. Source-separated organic waste includes non-recyclable paper and food scraps, such as banana peels, coffee grounds, and uneaten food, which could include fruits, vegetables, meats, grains, or dairy.

The proposed text amendment has been referred to the Planning Commission for review, report, and recommendation as required by Minnesota Statutes 462.357, Subd. 4. Please see the memo attachments for a copy of the resolution.

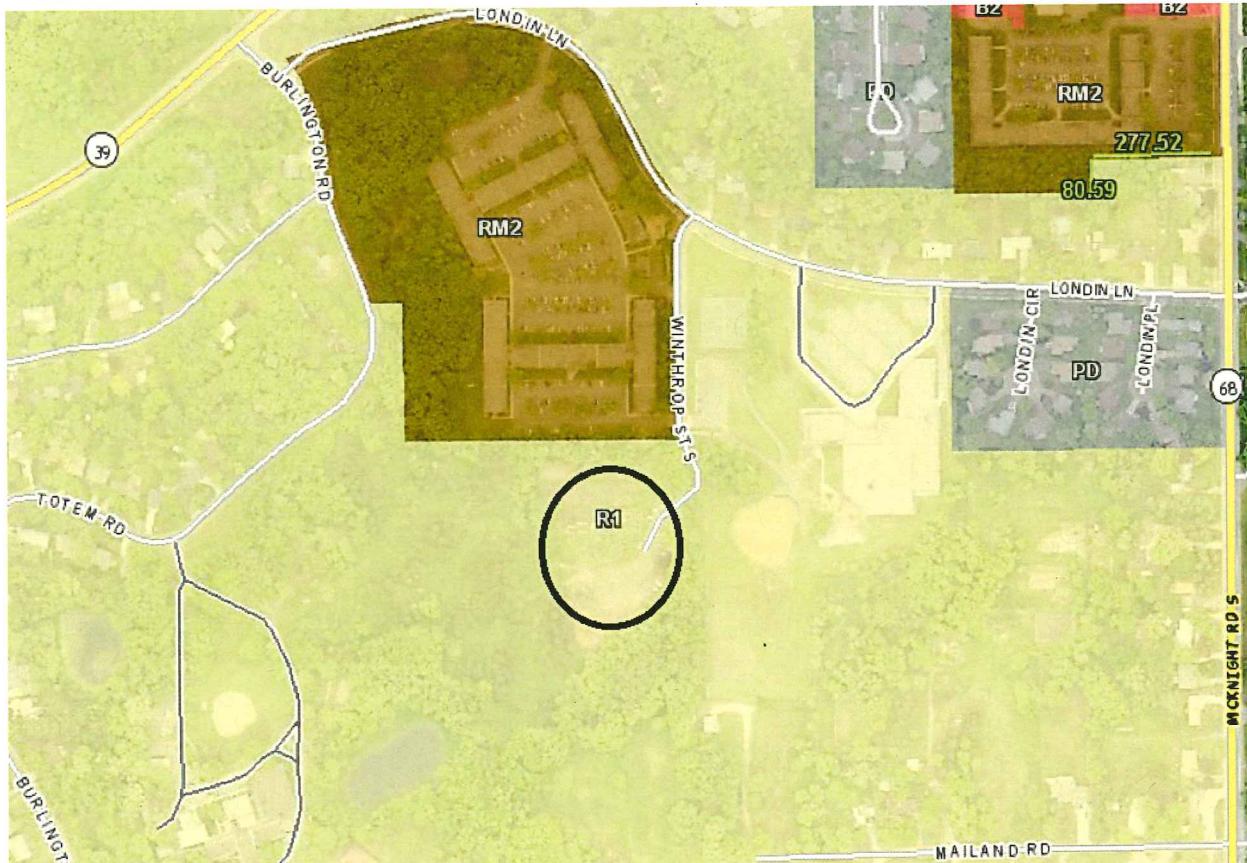

BACKGROUND

The City of Saint Paul has committed to increasing the city's organic waste recovery rate, consistent with the Minnesota Pollution Control Agency's goal for the region of increasing the rate from 4% in 2010 to 9-15% by 2030. This would present several benefits, including reduced future landfill space requirements and greater amounts of publicly available compost for landscaping or garden use. In the longer term, the City plans to study and potentially implement curbside or alleyway pickup of source-separated organics. However, the most practical short-term approach for increasing the organic waste recovery rate is to allow the organic material to be collected at the existing Ramsey County yard waste sites for transfer to organic composting facilities outside the city. Thus, the City Council has requested that a Zoning Code amendment be studied that would allow such organics collection at the yard waste sites. Currently, the Zoning Code permits only yard waste at these sites.

Saint Paul has four (4) yard waste sites that would be affected by this Zoning Code amendment, all of them owned and operated by Ramsey County. The sites are located at 389 Winthrop Street

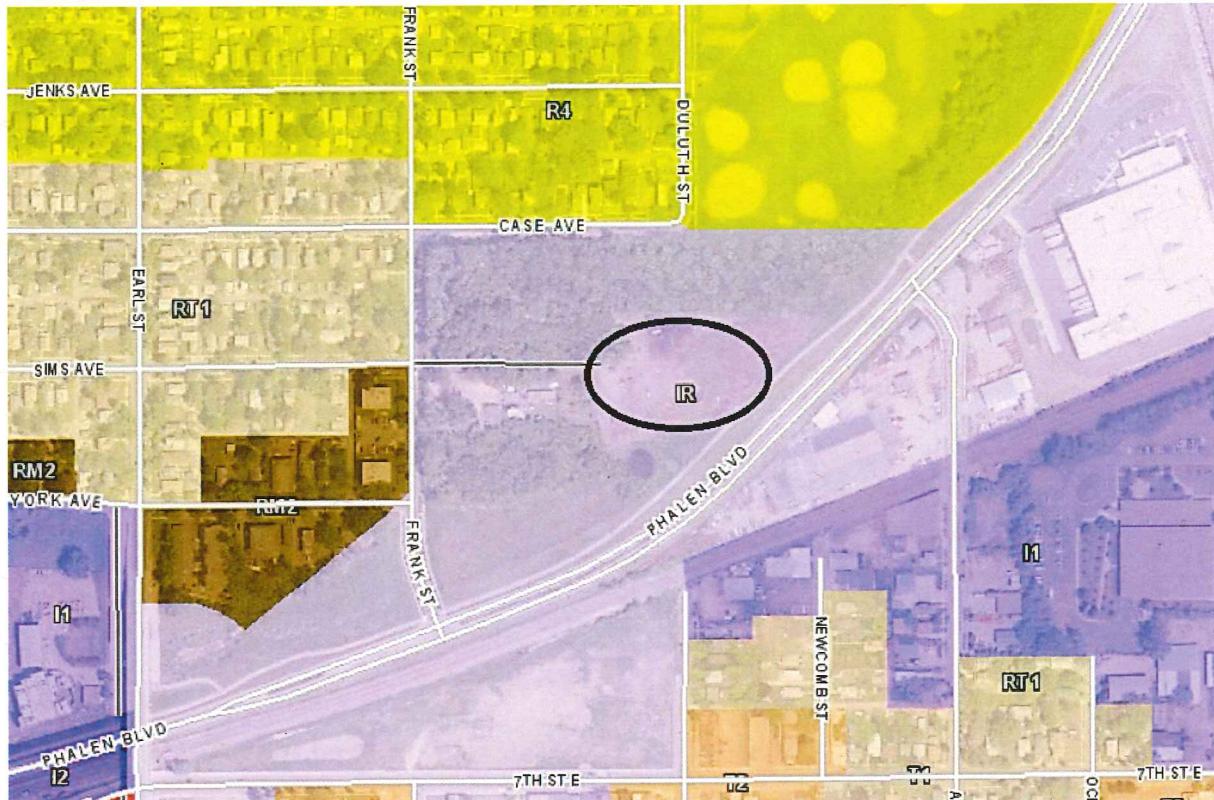

Neighborhood Planning Committee
Source-Separated Organics Text Amendment
Page 2

("Battle Creek" site), 1150 Sims Avenue ("Frank & Sims" site), 1943 Pierce Butler Route ("Midway" site), and 870 Pleasant Avenue ("Summit Hill" site). Maps of each follow below.

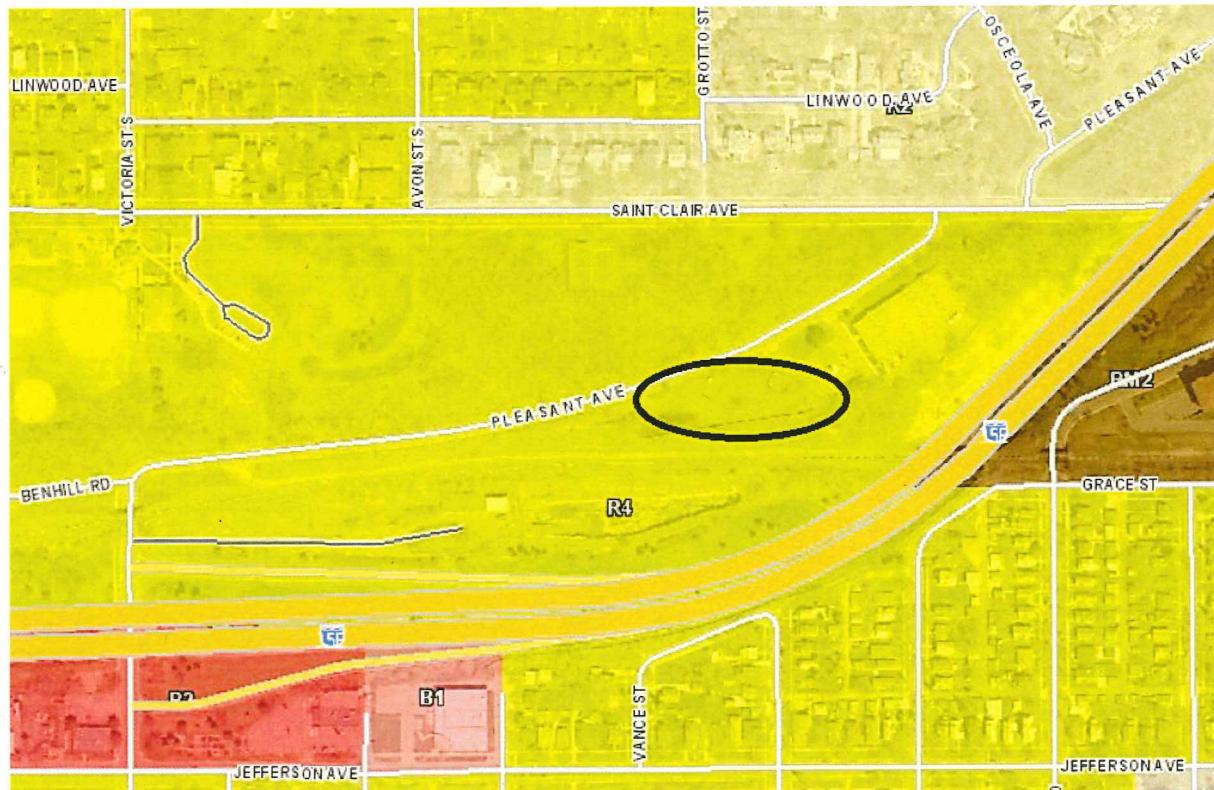

Battle Creek site (in circle)

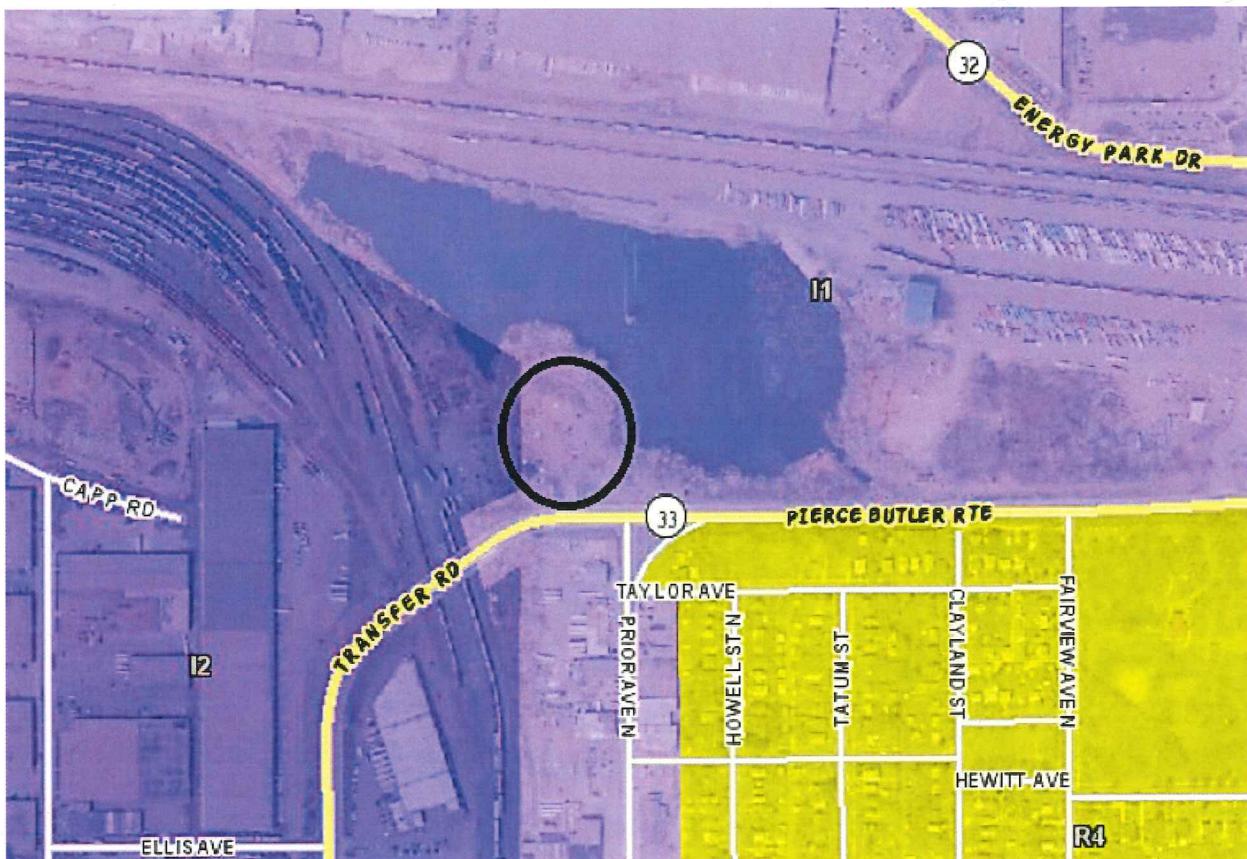

Neighborhood Planning Committee
Source-Separated Organics Text Amendment
Page 3

Frank & Sims site

Summit Hill site

Midway site

Ramsey County currently accepts residential yard waste such as leaves, grass, pumpkins, garden wastes, and non-woody plants at all four (4) sites, as well as branches, trees, and shrubs at the Frank & Sims and Midway sites. The yard waste is composted or mulched on-site and made available to residents in the spring.

Of the Ramsey County sites, Battle Creek and Summit Hill conform with zoning regulations and would continue to conform if source-separated organics collection and transfer were added as an accessory use. Though current regulations would require Conditional Use Permit (CUP) approvals at Battle Creek and Summit Hill, the sites were legally established before the CUP requirement was enacted. The Midway and Frank & Sims sites would require modifications to their previous CUP approvals (through new CUP applications) in order to allow source-separated organics collection and transfer. The Frank & Sims site was rezoned in 2006 from I1 Light Industrial District to IR (now known as IT Transitional Industrial District), which does not permit yard waste sites. However, the existing CUP conditions may be modified. Additionally, Zoning Code Sec. 62.106(q) specifically allows expansion for of existing yard waste sites in IT through the CUP process.

ANALYSIS

The Comprehensive Plan includes the theme of Environmental Sustainability. The proposed text amendment furthers that theme by providing for a practical option to reduce the amount of residentially generated organic waste ending up in landfills.

Meanwhile, the proposed text amendment does not contradict any Comprehensive Plan goals relating to protection of neighborhoods. Traffic generation is expected to be similar to existing yard waste site traffic. Of greater concern is controlling potential negative externalities such as odor or vermin, which can sometimes result from food waste. This concern is mitigated by the proposal to limit the use to collection and transfer of source-separated organics, with all composting occurring at off-site facilities. Furthermore, the requirement to keep the source-separated organics in closed, leak proof containers that are removed regularly is expected to effectively control such negative effects and differentiate it from an open air solid waste facility. Also, limiting the users to residents, rather than institutions or businesses, will keep the source-separated organics quantities to manageable levels.

NEIGHBORHOOD PLANNING COMMITTEE RECOMMENDATION

The NPC recommends approval of the proposed amendments to Secs. 60.220 and 65.331, which would allow for source-separated organics collection and transfer at municipal yard waste sites.

12/4/2013	1	City Council		

Initiating a study of zoning regulations pertaining to source-separated organics.

WHEREAS, the Council of the City of Saint Paul is committed to making Saint Paul the most livable city in America; and

WHEREAS, providing options for composting source-separated organics enhances livability in Saint Paul and furthers the Comprehensive Plan theme of Environmental Sustainability; and

WHEREAS, the Minnesota Pollution Control Agency has set a goal for the Twin Cities Metropolitan Area of a 9 -15% organics recovery rate from municipal solid waste by 2030, as compared to the 2010 rate of 4%; and

WHEREAS, the City is committed to increasing the amount of organic material that is composted outside of landfills and is exploring long-term options for collecting such material; and

WHEREAS, a practical short-term approach to increasing the organics recovery rate in Saint Paul is to utilize existing Ramsey County yard waste sites for source-separated organics collection; and

WHEREAS, the Saint Paul Zoning Code currently forbids yard waste sites from accepting any types of solid waste other than yard waste;

THEREFORE, BE IT RESOLVED, that the Council of the City of Saint Paul hereby refers the proposed amendments to Leg. Code §§ 60.220 and 65.331 as set forth below to the planning commission for study, and to receive from the commission a report and recommendation on the amendments, and any other zoning code amendments that the commission believes may facilitate the Council's intentions, all in accordance with Minn. Stat. § 462.357, Subd. 4:

Sec. 60.220. S.

Source-separated organics. Food scraps and non-recyclable paper that is separated at the source of its creation for the purpose of composting.

Sec. 65.331. Yard waste site, municipal.

A site owned or leased by a governmental entity and approved by the city, the county and the state pollution control agency for the storage, transfer or composting of yard waste.

Standards and conditions:

- (a) Only yard waste and ~~no other types of solid waste~~ source-separated organics shall be accepted.
- (b) The municipal yard waste site shall be located no closer than three hundred (300) feet from any residentially used property as measured from the edge of the nearest compost pile to the nearest residentially used property.
- (c) The municipal yard waste site shall be enclosed by fencing or shall limit vehicular and pedestrian access through the use of berms, trees or other means. In industrial districts, the site may have greenhouses for composting yard waste.
- (d) The height of the compost pile shall be limited to no higher than fifteen (15) feet above grade. In residential districts, the size of the municipal yard waste site shall be limited to no more than three thousand (3,000) cubic yards of material per acre.
- (e) The site shall be maintained cleanly including the immediate removal of waste materials deposited on or near the site which cannot be composted.
- (f) Source-separated organics shall be for collection and transfer only, with no on-site composting of material.
All source-separated organics shall be residentially generated and kept within leak-proof, closed containers while on the site, and shall be removed regularly.

AND, BE IT FINALLY RESOLVED, that the Council requests the Commission's review, report, and recommendation on the proposed text amendments to Leg. Code §§ 60.220 and 65.331 no later than 60 days from the date of reference of this resolution to the commission, as provided under Minn. Stat. § 462.357, Subd. 4.

planning commission resolution
file number _____
date _____

WHEREAS, the Council of the City of Saint Paul has requested that the Planning Commission provide a report and recommendation regarding potential amendments to Zoning Code sections 60.220 and 65.331 and any other Zoning Code sections which the Commission believes may facilitate the Council's intentions; and

WHEREAS, the Saint Paul Zoning Code currently forbids yard waste sites from accepting any types of solid waste other than yard waste; and

WHEREAS, the Saint Paul Planning Commission finds the proposed text amendments to be supported by the policies of the Comprehensive Plan;

NOW, THEREFORE, BE IT RESOLVED, by the Saint Paul Planning Commission, under the authority of the City's Legislative Code, that the following proposed amendments to the Legislative Code be recommended for approval by the Council of the City of Saint Paul:

ARTICLE II. – 60.200 GENERAL DEFINITIONS

Sec. 60.220. S.

Source-separated organics. Food scraps and non-recyclable paper that is separated at the source of its generation for the purpose of composting.

ARTICLE IV. – 65.300 PUBLIC SERVICES AND UTILITIES

Sec. 65.331. Yard waste site, municipal.

A site owned or leased by a governmental entity and approved by the city, the county and the state pollution control agency for the storage, transfer or composting of yard waste.

Standards and conditions:

- (a) Only yard waste and ~~no other types of solid waste~~ source-separated organics shall be accepted.
- (b) The municipal yard waste site shall be located no closer than three hundred (300) feet from any residentially used property as measured from the edge of the nearest compost pile to the nearest residentially used property.
