

Highlights of Phase II

- ① **Separation of regional trail and roadway:** construction of new roadway and regional trail, which eliminates existing roadway and trail conflict
- ② **Brickyard Trail head:** provides trail head at entrance to fossil grounds. Includes parking, signage and associated site amenities
- ③ **Bluff stream water feature :** captures bluff water and transports it through a rock cascade
- ④ **Burial of existing power lines :** remove existing overhead power line and replace with underground looped system
- ⑤ **Trail resting spots :** construction of three trail rest areas offering views of Mississippi River and downtown Saint Paul
