

Construction Update

Trout Brook Nature Sanctuary and Regional Trail July 2014

The area south of Maryland Avenue is almost finished. We have some minor adjustments left to complete and artwork to install. The restroom building should be completed in August. Thanks to Peterson Companies for their hard work! Seeding and planting will resume in September in partnership with Great River Greening. Join us for a volunteer planting event on October 11th. visitn www.greatrivergreening.org for more information. There have been many animals seen roaming through the site - turkey, deer, geese, ducks, toads, frogs. In early June the stream was loaded with tadpoles!
