

- 1 Design Intent**
 - 3 Interconnected play spaces
 - Multi-leveled play bridged by slides, climbing nets, and ramps
- 2 Circulation**
 - At grade access from main sidewalk
 - 5+ play area will have a ramp to the play structure
- 3 Safety Railing**
 - New ornamental railing around play areas
- 4 Drainage**
 - Sidewalk and gutter on side of building will drain to proposed rain garden to the north of the 2-5 play area
- 5 Seating**
 - Multiple small seating areas throughout with new benches
- 6 Resilient Surfacing**
 - Options: Sand, Wood Mulch, Rubber tiles, or poured-in-place rubber surfacing
- 7 Sidewalk**
 - Widen sidewalk to minimum 8'
 - Drain to edge, utilize trench drain from rain gutter
 - Add accessible walk around entire play area

Baker Recreation Center Play Area

August 2009

Concept 1-Interconnected
