

MONTREAL AVENUE

Charles Hansen, Project Inspector

Cell • 651-775-1223

Office • 651-266-6071

Project Inspector Charles Hansen will be on-site and have the most up-to-date information.

All questions should be directed to him.

If you have general questions, you may also contact the
Public Works Street Design and Construction department at 651-266-6080.

Update 12.04.2014

- This project is complete with the exception of the sewer work at the intersection of Snelling Avenue, and the permanent striping. These items will be completed in the spring of 2015.

Update 11.14.2014

- Most of the work on Montreal Avenue has been suspended for the winter.
- Crews are still working on installing the remaining street lights.
- Temporary striping is planned to go down when we have warmer weather.
- In the spring, the remaining sod will be placed.
- There is also sewer work at the intersection of Snelling Avenue that will occur sometime after school is out next summer.

Update 10.31.2014

This Week

- The base paving has been completed up to Snelling.
- The final layer of asphalt has been placed from St. Paul Avenue to Fairview.
- Sidewalks have been poured up to Snelling.
- Sod has been placed from Fairview to Davern.

Next Week

- Continue placing sod from Davern to Snelling.
 - Place the final layer of asphalt from Fairview to Snelling.
-
-

Update 10.24.2014

This Week:

- Sidewalk was poured from Fairview to 400' east of Davern, and on the eastbound side from St. Paul Avenue to Wilder.
- Curb and driveway aprons have been poured up to Snelling.

Next week:

- Place the base layer of pavement up to Snelling, and place the final layer of pavement from St. Paul Avenue to Fairview.
 - Begin placing sod east of Fairview.
-
-

Update 10.17.2014

This Week

- Montreal was paved from Fairview to 400' east of Davern, and on the eastbound side from St. Paul Avenue to Wilder.
- The storm water infiltration trench west of Snelling was completed.
- All remaining pavement has been removed from Davern to Snelling.

Next Week

- Finish grading and placing aggregate base from Davern to Snelling.
 - Pour concrete sidewalks from Fairview to 400' east of Davern.
-
-

Update 10.10.2014

This Week

- Concrete curb and driveway aprons have been poured from Fairview to 400' east of Davern, and on the south side of Montreal from St. Paul Avenue to Wilder.
- The storm water infiltration trench west of Snelling has been constructed.
- The class 5 aggregate base is being prepared for pavement.
- Sod has been placed on the south side of Montreal from Wilder to Fairview.

Next Week

- Pave Montreal from Fairview to 400' east of Davern and on the south side from St. Paul Avenue to Wilder.
 - Begin grading work from 400' east of Davern to Snelling.
-
-

Update 10.03.2014

This Week

- Sub-cutting and grading work has been completed from Fairview to 400' east of Davern.
- Concrete curb has been placed from Fairview to 400' east of Davern, and along the south side of Montreal from St. Paul Avenue to Wilder.

Next Week

- Install driveway aprons in areas with new curb.
 - Construct rock infiltration trench west of Snelling.
 - Tolerance aggregate base to prepare for paving.
-
-

Update 09.26.2014

This Week

- Sewer work was completed between St. Paul Avenue and Wilder.
- All remaining pavement will be removed from Fairview to about 750' east of Davern.
- The south lane has been sub-cut and covered with aggregate base from Fairview to about 750' east of Davern.
- Sod has been placed between St. Paul Avenue and Fairview.

Next Week

- Continue removing pavement, sub-cutting, and placing aggregate base from Fairview to Snelling.
 - Finish placing sod between St. Paul Avenue and Fairview.
 - Begin placing curb between Fairview and Snelling late next week.
-
-

Update 09.19.2014

This Week

- Crews have finished pouring sidewalk from Wilder to Fairview.
- Aggregate base has been placed on the north lane of Montreal from Fairview to Davern.
- Pavement will be removed in the south lane from Fairview to Davern.
- Sanitary sewer work has begun from St. Paul Avenue to Wilder.

Next Week

- Continue removing pavement, sub-cutting, and placing aggregate base from Fairview to Snelling.
 - Finish the sanitary sewer work from St. Paul Avenue to Wilder.
-
-

Update 09.12.2014

This Week

- Existing sidewalk was removed and new sidewalk has been poured between Wilder and Fairview.
- All water services have been connected to the new main. After the new main is tested, the temporary services will be disconnected.
- Work on the new traffic signal system at the Fairview Avenue intersection is complete.
- Sewer work is complete from Fairview through the Davern Avenue intersection.
- The Fairview Avenue intersection will be open to traffic on September 13, 2014.

Next Week

- Aggregate base will be placed on the north side of Montreal from Fairview to the east through the Davern Avenue intersection.
 - After the base is on the north side, crews will begin removing pavement on the south side from Fairview to Davern. **At this time, there will be no parking on the south side, and residents will be asked to park along the north side of Montreal.**
-
-

Update 09.05.2014

This Week

- The base layer of asphalt has been placed on Montreal from Wilder to Fairview.
- New water main has been installed from Davern to Snelling.
- Conduit and foundations have been installed for the new traffic signal system at the Fairview Avenue intersection.

Next Week

- Water services will be connected to the new water main from Davern to Snelling.
 - Storm sewer work will occur from Fairview to Davern.
 - Late next week, aggregate base will be placed on the north side of Montreal from Fairview to the east.
-
-

Update 08.29.2014

This Week

- Curb has been placed from Wilder to Fairview.
- Most of the driveway aprons in that area have also been poured.
- New water main has been installed in the Davern intersection.
- Work has begun preparing the aggregate base for paving between Wilder and Fairview.
- Installation of the new traffic signal system at Fairview has also begun.

Next Week

- Water main installation will continue toward the east.
 - Work will continue on the signal system, and on preparing for pavement.
-
-

[Update 08.22.2014](#)

This Week

- Pavement has been removed along the north side of Montreal from Fairview to Snelling.
- New water main has been installed from Fairview to Davern.
- The existing water services along the south side have been connected to the new main.
- The services along the north side will be connected within the next few days.
- The class 5 aggregate base at the Fairview intersection will be placed by the end of the week.

Next Week

- Water main installation will continue toward the east, and new curb from Wilder to Fairview will be poured.
 - After all the water services have been reconnected, aggregate base will be placed on the north side of Montreal from Fairview to Snelling.
-
-

[Update 08.15.2014](#)

This Week

- Pavement has been removed in the Fairview intersection and along the north side of Montreal from Fairview to Davern.
- All utility work has been completed in the Fairview intersection, and water main has been installed in Montreal from Fairview toward the east.

Next Week

- Water main installation will continue toward the east, and the Fairview Ave intersection will be graded.
 - New curb from Wilder Street to Fairview Avenue could possibly be placed late next week.
-
-

[Update 08.08.2014](#)

This Week

- The remaining pavement has been removed in the eastbound lane from Howell to Fairview.
- Both sides of the roadway have now been graded and covered with aggregate base from Wilder Street to Fairview Avenue.

Next Week

- Utility work in the Fairview intersection will begin on Monday. **The intersection will be closed for approximately 4 weeks.**
- Pavement removal on Montreal from Fairview to Snelling will also start on Monday. The north side of the roadway will be removed to allow for installation of the new water main.

- Parking will be allowed along the south side of Montreal at this time.
-
-

[Update 08.01.2014](#)

This Week

- All pavement between St. Paul Avenue and Fairview Avenue has been removed.
- The westbound lane of Montreal has been graded and covered with class 5 aggregate base from St. Paul Avenue to Fairview Avenue.
- The eastbound lane of Montreal has been graded and covered with class 5 aggregate base from Wilder Street to just east of Howell.
- Sewer work is complete between Wilder Street and Fairview Avenue.

Next Week

- Grading work will continue on the remaining section of eastbound Montreal from Howell to Fairview.
 - **Note:** Montreal Avenue will close from Fairview Avenue to Snelling Avenue beginning August 11th. At that time, the Fairview Avenue intersection will be completely closed to traffic.
-
-

[Update 07.25.2014](#)

This Week

- All water services have been connected to the new 16" water main from St. Paul Avenue to Fairview Avenue.
- The water department is now in the process of disconnecting temporary services and reconnecting houses to the new services.
- Class 5 aggregate base has been placed on the westbound lane of Montreal from St. Paul Avenue to approximately 600' west of Fairview Avenue.
- Pavement removal on the eastbound lane has begun at St. Paul Avenue.

Next Week

- Pavement removal will continue on the eastbound lane from St. Paul Ave to Fairview Avenue.
 - Aggregate base will be placed on the remaining 600' of the westbound lane up to Fairview Avenue.
-
-

[Update 07.18.2014](#)

This Week

- The 16" water main has been installed from St. Paul Avenue to Fairview Avenue.
- Work has begun on reconnecting the water services to the new main.
- The St. Paul Avenue intersection has been restored and will be open to traffic in the afternoon of July 18th.

Next Week

- The remaining water services will be connected to the new main.
 - Class 5 aggregate base will be placed on the westbound lane from St. Paul Avenue to Fairview Avenue.
 - After the base has been placed on the westbound lane, the eastbound lane will be closed and the pavement will be removed.
-
-

Update 07.03.2014

This Week

- Pavement and curb was removed in the westbound lane from St. Paul Avenue to Fairview Avenue.
- 16" and 8" water main was installed in the Montreal/St. Paul Avenue intersection.

Next Week

- Installation of the 16" water main will continue from St. Paul Avenue to the east.
 - Restoration of the St. Paul Avenue intersection will begin.
-
-

Update 06.27.2014

This Week

- Pavement was removed in the intersection of St. Paul Avenue.
- The bituminous surface was milled on the westbound side of Montreal from St. Paul to Fairview Avenues.

Next Week

- Water main will be installed early next week beginning in the St. Paul Avenue intersection and proceeding east.
 - Pavement and curb removals will begin on the westbound side of Montreal from St. Paul to Fairview Avenues.
-
-

Please be cautious of the construction workers
and obey the signage on the project.
Thank you!
