

WebEx Success Tips and Tricks

- Please keep your cameras off
- You will be automatically muted when you join the meeting
- Do not put the WebEx on hold
- Make sure you do not have 2 audio functions on
(example: the phone and computer audio) this will cause an echo
- For best performance, close the internet except for the WebEx and close larger programs
- You will be muted by the host during the WebEx to minimize background disturbances and eliminate more than one person talking at a time
- For any questions please use the chat function - the questions will go to the entire group
- Questions will be answered as they are received

Project Background

Ford Site Project Studies

Since 2006, when Ford Motor Company announced its intent to close the plant, the City of Saint Paul has been working actively to plan for the site's future.

Professional Studies

- A total of 14 professional studies conducted by the City and additional studies by Ford Motor Company have examined a wide range of topics, such as the potential of industrial reuse, a geotechnical analysis of the tunnels under the site, open space priorities, sustainable design, stormwater management, and traffic impacts.
- The studies were essential to understand opportunities for and limitations on the redevelopment of the site – economically, environmentally, socially, and within the context of the community. The studies identified infrastructure efficiencies, cost-effectiveness, opportunities for environment design and conservation, and how to strike a balance between development and the creation of vibrant public spaces
- The Ford Site Zoning and Public Realm Master Plan, adopted by the Saint Paul City Council in 2017, is the culmination of a decade of planning for the site. It provides a framework to guide mixed-use redevelopment of the 122-acre main assembly plant parcel and the adjacent 13-acre rail yard. It does not include the 22-acre river parcel ("Area C").

Community Engagement and Adoption

- Since 2007, the City has been seeking the community and other stakeholders' visions and priorities for the Ford site. The thousands of ideas and suggestions that we have received over the past 10 years, and through more than 140 public meetings of all sizes, have shaped the redevelopment framework for the site.

Role of Parks Advisory Committee (PAC)

The Parks Advisory Committee provides volunteer opportunities for stakeholders to share insight and resources and serve to build and sustain relationships between the community and the City of St. Paul. Members of the PAC are expected to represent the views of park users and to work collaboratively with each other and the project team to provide insight, feedback and information to the community about the project.

Responsibilities of PAC members include:

- Become knowledgeable about the Project and its goals,
- Understand and represent the park and recreation needs of the community and park users,
- Act as community liaisons for the project,
- Provide feedback on the park plans,
- Help identify priorities and needs within the Park System and within their communities,
- Provide insight on the direction of Park development,
- Report back to the community, on the design process, information presented, and the development of the parks,
- PAC members are expected to attend and participate in PAC meetings throughout the design process.

HOMEWORK – Conversations

What is a Conversation?

A digital discussion hosted through a phone call or video conferencing solution like Webex, Zoom, Microsoft Teams or Facebook. Groups will meet for 20-30 minute conversation to share thoughts, connect together, and discuss the parks development and its desired amenities and programming. This is a perfect opportunity to connect and grow with others on the PAC and have the ability to collaborate and discuss the project in an open and creative environment

FORD SITE

CONFLUENCE 4

44

HOMEWORK – Conversations

Conversation Group Guide

You will be randomly placed in a group of three PAC members to share your conversation with. Your first task will be to:

- **Choose how you will connect**
Decide as a group if you'd prefer to share a phone conversation together or if you'd rather share a face to face conversation using a video conferencing format of your choice.
- **Set the Date**
Set a date and a time for when you want to have your conversation and make sure you are all available.

FORD SITE

CONFLUENCE 4

45

HOMEWORK – Conversations

Conversation Questions

You will have a series of questions to ask each other to stimulate conversation. Please take turns asking and answering the questions.

Questions

Ice Breaker Question:

What is your favorite activity that you like to do in City Parks?

1. What activities and amenities did you select as your top priorities? Discuss why.
2. What do you see as the most critical feature in the 60% plans that will make the parks successful?
3. Community and connection are intended to be a part of the design. How do we best accomplish this goal in the parks?
4. What features or amenities that that are shown in the 60% parks plans resonate most with you?
5. What features or amenities do you feel are missing from the 60% plans?

FORD SITE

CONFLUENCE 4
3

46

HOMEWORK – Conversations

Conversation Review

Once your conversation is complete, please summarize your thoughts and discussion in a brief or in-depth written review of the questions and discussion that happened. It is the desire of the project team to have each PAC member individually write and submit your summary to capture the conversation.

These summary's will be used to help further define design direction and prioritization of the Parks amenities and activities.

IDEAS FOR KIDS

We know that some Conversation Groups will be happening with children in the home, spend some time and see what your children think would make a great park. Have them draw themselves at the park or design their own park.
