**RE: 2022 Prior Avenue Project**

Dear Property Owner,

The City of Saint Paul plans to improve Prior Avenue between Gilbert Avenue and University Avenue in 2022. The project will improve the pavement condition, upgrade the existing pedestrian and bicycle facilities, and include work on the water and sewer utilities. Some of the planned improvements include:

- Addition of sidewalk on the west side of Prior Avenue, where there is currently no sidewalk
- Installation of bump outs at some of the intersections to improve pedestrian safety

**As an adjacent property owner of this project, we would like to hear how you currently use the street and what future improvement you might like to see.**

**Please take a short survey to share your thoughts at [stpaul.gov/priorave](http://stpaul.gov/priorave).**

Your input and experiences with Prior Avenue are essential in helping the City shape this project. For more information and to sign up for email updates about this project, please visit [stpaul.gov/priorave](http://stpaul.gov/priorave).

Thank you,

Jary Lee, P.E.  
Project Engineer
