## CARING FOR YOUR NEW SOD

New sod has recently been placed in your boulevard

Please avoid walking on the sod for 2 weeks

| <b>WATERING</b>   | <b>MOWING</b>  | <b>FERTILIZING</b>  |
|---|--|---|
| <p>The contractor will water the sod for the first 30 days</p> <p>After the first 30 days, watering becomes the SOLE responsibility of the property owner</p> | <p>Set your mower to its highest setting</p> <p>New sod may die if its cut at a shorter height</p> | <p>Do not fertilize until early spring</p> <p>An earlier application risks destroying the sod</p> |

We appreciate your assistance!

Division of Street Design and Construction

**CONTRACTOR + RESIDENTS = HEALTHY SOD**
