Saint Paul Bicycle Plan Update

Spring 2023
Stpaul.gov/bikeplan

Agenda

- Timeline
- Reminder about current Bike Plan
- Fall 2021 engagement summary
- What we did in 2022
- Draft plan overview
- Draft planned bicycle network
- Draft updated priorities
- Next steps and engagement opportunities

Definitions

- **Bikeway, bike facility, bike infrastructure:** a space designated for bicycle use. Can be shared with drivers or pedestrians. Or could be just for bikes.
- **Bike network:** all the combined bikeways across the city form a web to create the bike network
- **Bike plan:** a document that guides development of the bike network into the future. It sets goals and represents agreement by the public, partner agencies, and will be referenced in the future

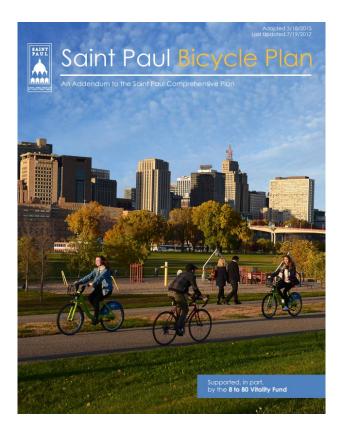

TimelineSummer 2021 - Summer 2023

2015 Saint Paul Bicycle Plan

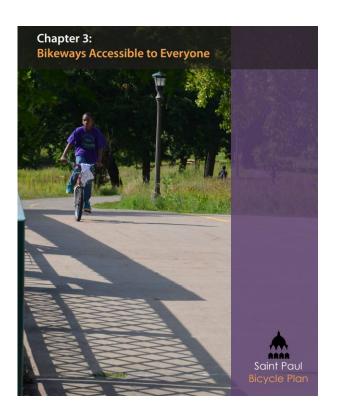

- Adopted in March 2015
- Provides direction for the development of a network of bicycle facilities
- Highlights engagement process between 2011 and 2014
- Updated in 2017 to include CCB and Grand Round
- Recommends additional updates, without specific timeline

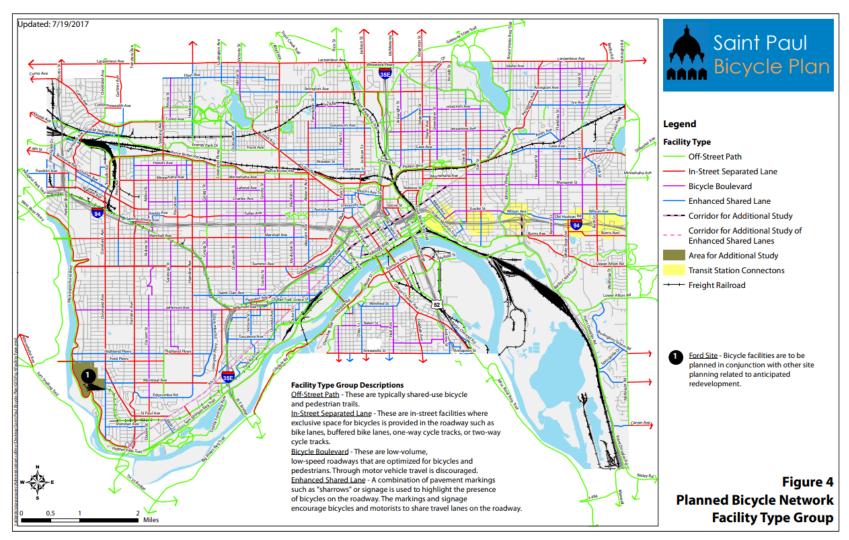

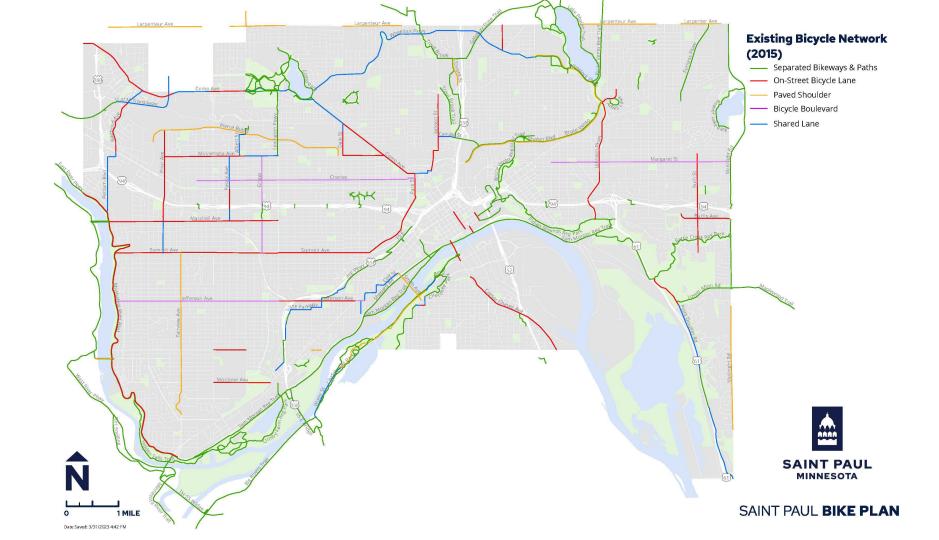

How is the Plan used?

- To guide development of the network when opportunities arise
 - Mill & Overlay projects
 - Street reconstructions
 - New development
 - Transit projects
- As a reference for other planning efforts

Progress made since 2015

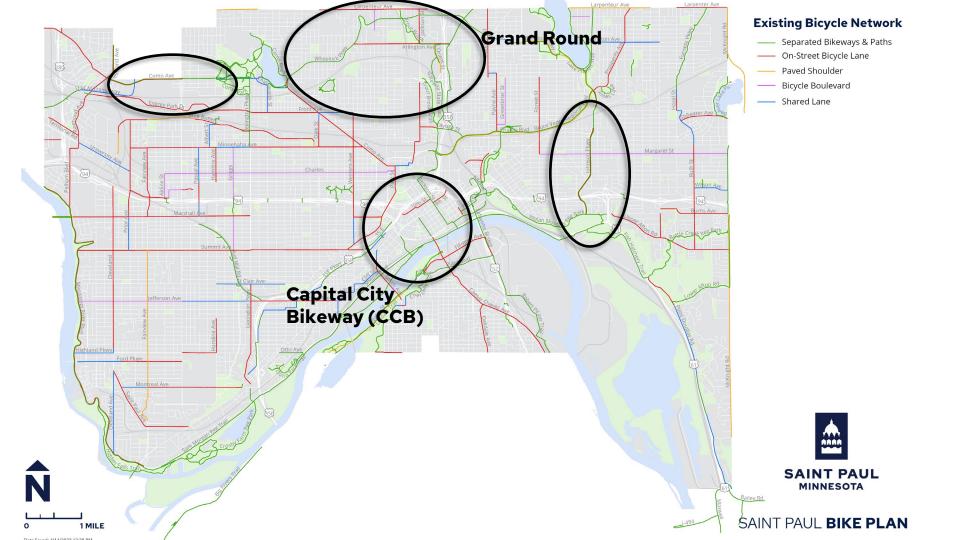

- 59 miles of bikeways have been added since 2015
- Includes implementation from Parks & Rec, Ramsey County, MnDOT, DNR

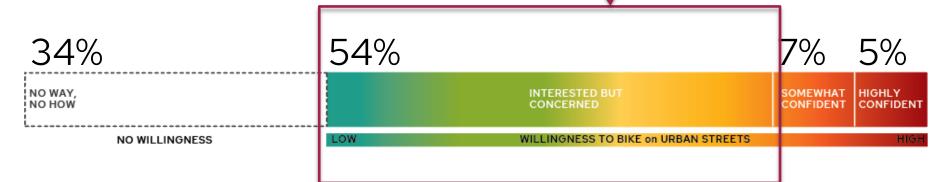

What are our biking and transportation goals?

- Improve safety for people riding bikes
- We want more and new bikers riding
- We want to limit our impact on climate change
- We need to accommodate the movement of 30,000 more people by 2040

What we did in Fall 2021

- Project webpage, email updates to 3,600+ addresses, social media, flyers at libraries and rec centers
- Five in person events partnering with other events
- 22 virtual presentations to District Councils, stakeholders, commissions and committees, Council offices
- Online survey that received 1,694 responses

Goals of engagement

- Share information about current Bicycle Plan and existing bike network
- Create opportunities to share information about the scope and objectives of the update
- Receive ideas from the public about missing bike network links and streets that should be planned for bike facilities
- Understand where and how the City should prioritize their resources to expand a safe and comfortable bike network

Lub Nroog Saint Paul tab tom kho Qhov Kev Npaj Caij Tsheb Kauj Vab

Lub hom phiai ntawm ghov kev nai caii tsheb kaui vab yog dab tsi?

Txoj kev npaj caij tsheb kauj vab yog ib ib daim ntawv uas qhia rau cov neeg ua hauj lwm nyob hauv nroog tuaj yeem caij tsheb kauj vab mus los tau rau cov kab kev tsheb kauj vab. Cov neeg npaj caij tsheb kauj vab thiab

tau saib ghov kev npaj caij tsheb kauj tsim txoj kev li cas thiaj li yuav zoo thiab im ntawy no yuay ya ray Lub Nroog los hauv lub nroog rau yav tom ntej, kom thiab muai key lay ris.

If you'd like to be more involved, email staff at: jimmy.shoemaker@ci.stpaul.mn.us

Do you bike to school or in

City of Saint Paul staff are working to update the

Saint Paul Bicycle Plan. The Bicycle Plan tells staff

It is critical that we hear from young adults when

thinking about the future, because the city will be

would you like to see bike lanes and paths?

What makes biking in Saint Paul easy? Hard? Where

where to construct bike lanes and bike paths in the

your neighborhood?

Results of engagement Fall 2021

- 1. Safety is what people want
 - a. Separated spaces to bike
 - b. Slower traffic speeds
- 2. Improved street condition/maintenance
- 3. More of a connected network
- 4. More bike parking
- 5. Better snow and ice maintenance
- 6. Specific connections (see Summary)

Fall 2021 Engagement Summary

Saint Paul Bicycle Plan Update

February 2022

Project contact:

Jimmy Shoemaker, Senior City Planner

Department of Public Works

jimmy.shoemaker@ci.stpaul.mn.us | 651-266-6204

Spring 2023 Engagement

- Sharing network updates, policies, and priorities based on our Fall 2021 engagement
- Focused engagement towards people we didn't hear from in Fall 2021
 - BIPOC community
 - Districts east of downtown, West Side
- In person, partnering with other events

- Separated bikeways should be expanded across the city:
 - State and national best practice
 - Separated bikeways mean safer streets for everyone
 - Local policy guidance
 - Community wants them!
- To incorporate bike network additions and identify new priorities
- To add policy guidance on operation, maintenance, and funding to ensure high level of service of the bike network

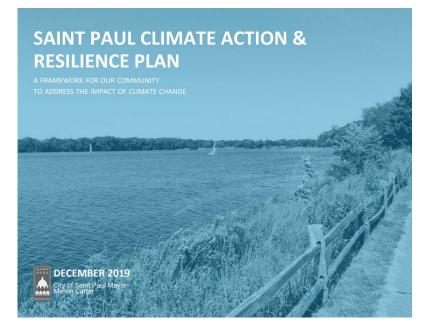

- Separated bikeways should be expanded across the city:
 - State and national best practice
 - Separated bikeways mean safer streets for everyone
 - Local policy guidance
 - Community wants them!
- To incorporate bike network additions and identify new priorities
- To add policy guidance on operation, maintenance, and funding to ensure high level of service of the bike network

- Separated bikeways should be expanded across the city:
 - State and national best practice
 - Separated bikeways mean safer streets for everyone
 - Local policy guidance
 - Community wants them!
- To incorporate bike network additions and identify new priorities
- To add policy guidance on operation, maintenance, and funding to ensure high level of service of the bike network

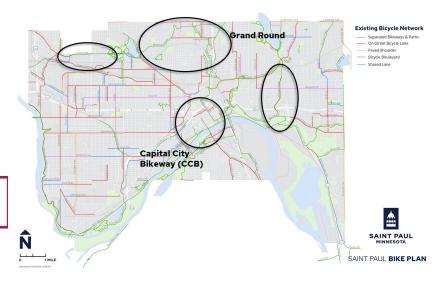

- Separated bikeways should be expanded across the city:
 - State and national best practice
 - Separated bikeways mean safer streets for everyone
 - Local policy guidance
 - Community wants them!
- To incorporate bike network additions and identify new priorities
- To add policy guidance on operation, maintenance, and funding to ensure high level of service of the bike network

- Separated bikeways should be expanded across the city:
 - Local policy guidance
 - Community wants them!
 - Separated bikeways mean safer streets for everyone
 - State and national best practice
- To incorporate bike network additions and identify new priorities
- To add policy guidance on operation, maintenance, and funding to ensure high level of service of the bike network

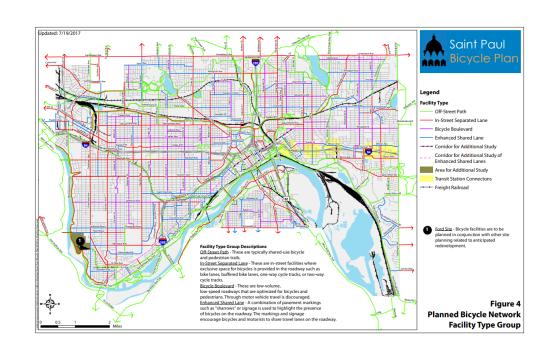

- Separated bikeways should be expanded across the city:
 - Local policy guidance
 - Community wants them!
 - Separated bikeways mean safer streets for everyone
 - State and national best practice
- To incorporate bike network additions and identify new priorities
- To add policy guidance on operation, maintenance, and funding to ensure high level of service of the bike network

What was done in 2022?

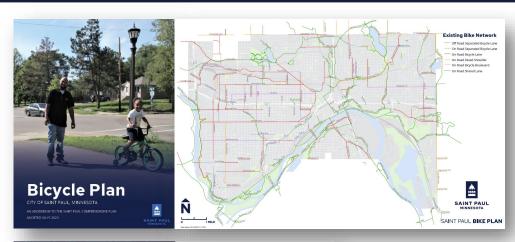

- Analyzed every comment we received from Fall 2021 engagement
- Evaluated every bikeway line in the planned network
- Considered new bikeway priorities and policies/practices
- Created an updated Plan document

Draft Updated Plan overview

- Based largely on the current plan, includes updates to reflect work since 2017 (last update)
- Features many of the same maps, but updated
- Consolidated chapters to improve approachability and readability
- Includes Executive Summary so some one can choose to read a shorter document
- Updated to match current City branding

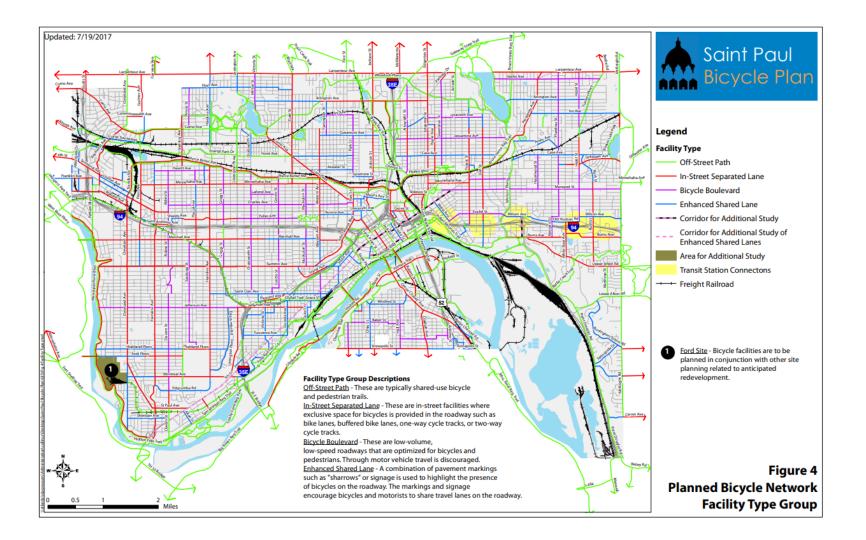

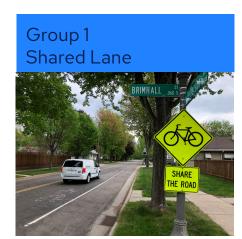

Updating the Planned Bicycle Network

- An evaluation of every line drawn in the planned network
 - Starting with the adopted Planned Network
 - Is it on the correct street?
 - Is it the correct bikeway type?
- Considered new lines
 - Are there upcoming projects that should be added?
 - Are there missing bikeways that create a network of connected and comfortable bikeways?
- Removed some lines
 - Are some infeasible/not possible?
 - Would some bikeways be unnecessary if a better bikeway existed nearby?
 - Are some lines duplicative (two bikeways on same street)?

2023 Bicycle Plan Facility Types – same as current Plan

Still used, though minimally

Still used for network on low volume, low speed roadways

Standard bike lanes Buffered bike lanes

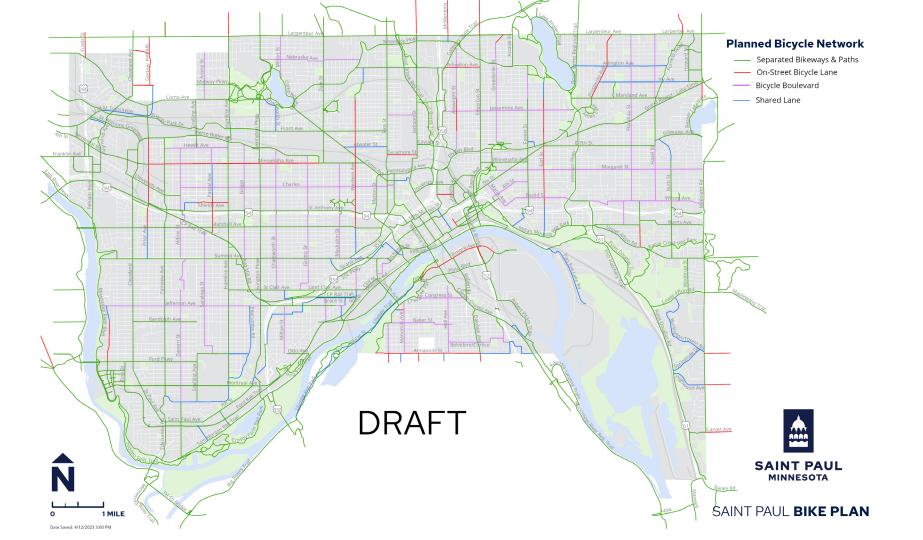

Still used

Group 4
Separated Bikeways &
Paths

Shared use path Sidepath Separated bike lane

Still used, expanded in network

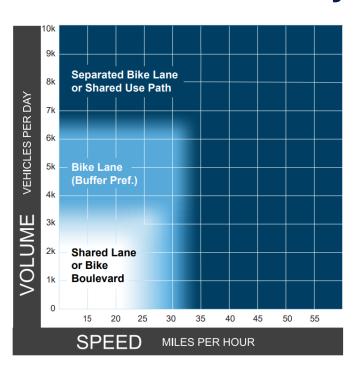

What does a city with more separated bikeways and paths mean?

- Strengths
 - They are what the public wants
 - They will encourage more and new riders
 - They align with best practice, and our adopted goals and policies
 - They promote pedestrian safety by narrowing the street and calming traffic
- Challenges
 - It may take longer to construct a network of separated bikeways compared to an on street network
 - Will require an adjusted maintenance strategy to provide adequate level of service for people biking
 - They often take up more space, so tradeoffs with other road uses will need to be considered (parking, travel lanes, trees and boulevards)
 - They have a slower operating speed (we will likely hear from confident bikers that they prefer on street bikeways)

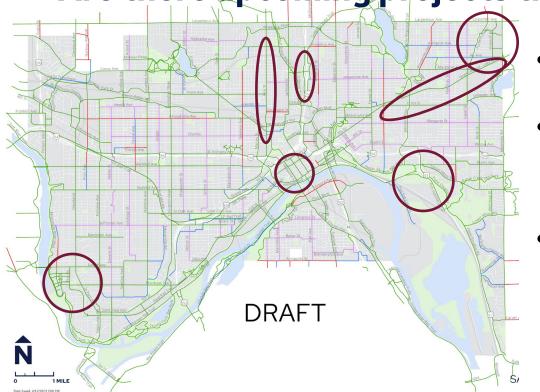

Is the correct bikeway type on the street?

- Several streets previously planned for bike lanes (red lines) are now planned for separated bikeway or paths (green lines)
 - Ruth St
 - Burns Ave
 - Hamline Ave
 - Cleveland Ave
- Some streets planned for shared lanes (blue lines) now planned for separated bikeways or paths
 - Ford Pkwy
 - Saint Clair Ave

Are there upcoming projects that should be added?

- Large redevelopments
 - Hillcrest (The Heights)
 - Ford Site (Highland Bridge)
- Corridor studies and plans
 - Rice St (Ramsey County)
 - Wabasha St downtown (interim CCB study)
 - Gateway State Trail (MnDOT)
- Regional Planning
 - Point Douglas Regional Trail
 - o Regional Trail Search Corridors

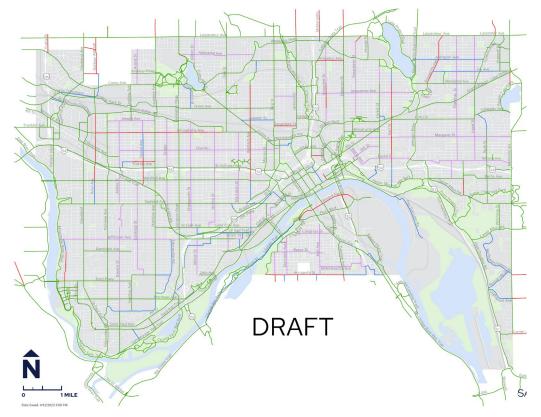

Are there any that should be removed?

- Connections requiring major property acquisition
 - Extension of Pierce Butler to Pennsylvania
 - Fuller through Midway site
- Not the appropriate facility
 - o W 7th
 - Case Ave
 - Ohio
 - University
- Redundant corridors with better bikeways
 - Highland Pkwy Ford Pkwy
 - o Idaho Larpenteur
 - o Park Rice

Assumptions

- Next Best bikeway will be used as an option if the scope of a project does not match the planned bikeway type
- Additional design will be needed to decide details of bikeways
- This is a long term network plan. It will require additional updates as the needs and desires of the community change

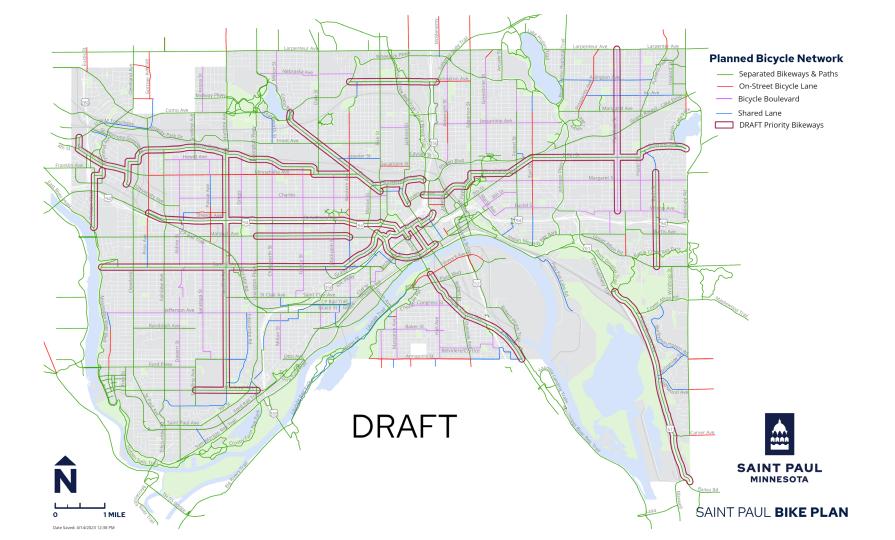

Priorities

- Network priorities
 - Where do we want to focus our resources to build out more bikeways in Saint Paul?
- Policy & process priorities
 - What should the City do to make biking better?

New Network Priorities

- Complete the final pieces of Capital City Bikeway and Grand Round
- Other priorities on next slide based on:
 - Public input where people want bikeways
 - Likelihood of receiving external funding through competitive grants, etc
 - Street reconstruction and increased funding
 - Improving bicycle transportation options in Saint Paul
 - Geographic distribution across the city

Policy & Process Priorities

- Consult planned bike network when choosing projects: Among other project selection criteria, consider the planned bike network when selecting and prioritizing street reconstructions so the city can more quickly build out the low stress bike network in this plan.
- **Plan for and fund maintenance of bike network:** Create a bike network maintenance strategy to better understand what's needed for a year round high quality network. This could include network priorities for snow and ice management, pothole patching and resurfacing, and appropriate level of service. Pursue increased funding for maintenance staff and equipment
- Pursue external funding to implement bike network: Where the planned bike network cannot be implemented by ongoing street reconstructions, consider grant funding through programs like Regional Solicitation and others. Reference Network Priorities list.
- Coordinate to construct bikeways in rail corridors: Work with partner agencies to develop bikeways in rail corridors

Next steps and opportunities for engagement

- Focused engagement, meetings with District Councils, stakeholders, commissions and committees, Council offices
- Online engagement opportunities
- Public in person and virtual open houses
- Public Hearing and City Council adoption this summer

Stpaul.gov/bikeplan

Map for Planned Saint Paul Bicycle Network and

Priorities

Add a pin by clicking the + circle button, then drag and drop a pin to the map. Once added, pins and comments can be changed, but not deleted. Feedback on the map is anonymous.

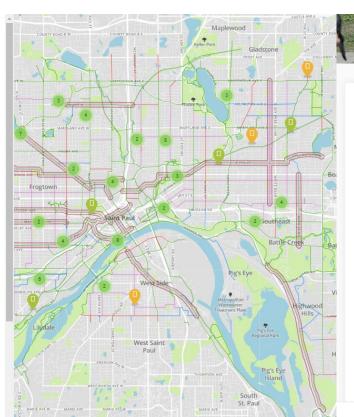

Planned Bicycle Networks are Differentiated by Color

Colored lines represent different spaces for biking called "bikeways" the City plans to build bikeways in the future. This map will be referenced by planners and engineers who design and make decisions about streets in Saint Paul.

- BLUE: Shared lanes are streets where people biking and driving share the street.
- PURPLE: Bicycle boulevards are streets where people bilking and driving share the street. The City might consider limiting driver access on these streets or adding physical elements to the street that would encourage slower driving and limit traffic.
- RED: Striped bike lanes are where white lines striped on the pavement next to cars provide a separate "lane" for people biking.
- GREEN: Separated bikeways and paths are streets where the space for biking is physically separated from drivers using a curb, a boulevard, etc.

Priority Bikeways are Outlined in Red

Driority hikawaye are chown as red

Draft Bicycle Plan survey

Thank you for your interest in biking in Saint Paul. Please complete the survey below and don't forget to add your thoughts to the interactive map linked here. Share this with a friend!

Completing the survey in addition to adding a comment to the map $% \left(x\right) =\left(x\right) +\left(x\right) +\left$

If you have comments about the planned bicycle network and the network priorities in addition to those you added to the interactive map, please share them using this survey.

Check out the Planning Document for more details

The planned blike network is discussed on page 52 of the <u>Praft Bicycle Plan</u>. Network priorities (discussed on page 86 of the document) are where the city plans to build blikeways in the short term.

Survey starts Finish

All fields marked with an asterisk (*) are required.

- 1. The City of Sant Paul aims to prioritize key improvements to expand the bike network and make biking easier. How would you rank the following priorities?
 - When the city is choosing streets for reconstruction, the planned bicycle network should be considered
 - Plan for and fund maintenance of the bike network
 - Pursue external funding to implement the bicycle network, and conduct preliminary analyses to be more competitive for the external funding
 - Coordinate with local partners and railroad companies to construct regional bikeways in rail corridors

Thank you!
