

Multi-Family Building Efficiency Program Roadmap

Energy audit

Identify your opportunities

Our team will walk through your property to take inventory of your natural gas and electric equipment, examine the building HVAC operation and develop a list of recommendations.

Our program offers to provide and install energy-saving items at no cost to you, resulting in immediate savings for you and your residents.

Direct install

Your immediate energy savings

Project selection

Take action towards your incentive-eligible upgrades

A report for your property will be delivered to you via email and our staff will review the contents with you. **Complete as many energy projects as possible within two years to maximize your incentive potential.**

Think of our program staff as your guide. They are available through this program to provide you with consultation support and be your single point of contact to help guide you through the process of your energy efficient upgrades.

Project support

Let us guide you through the process

Apply for rebates

We offer a **30% bonus incentive** on top of existing custom and prescriptive rebates for eligible projects completed within two years. *Qualified affordable housing multi-family buildings can earn a **200% bonus incentive**.*

A more efficient building contributes to increased comfort, cost savings, environmental benefits, and happier residents.

Enjoy your savings

Eligibility to participate

- Located in Minnesota
- Has five or more units
- Electric service through Xcel Energy
- Natural gas service through CenterPoint Energy or Xcel Energy
