

Setting Group Expectations Reflection Sheet

Here's What...

Write or discuss the information shared in the "Quick Guide to Setting Group Expectations". What information (if any) was new/different, and what information was familiar to you?

So What?

Write or discuss your interpretation of what was presented. Compare/Contrast the examples shared (setting expectations in a shared space, using above/below the line, and having the group create their own expectations). What are some strengths and weaknesses for each? Which example is most relevant to your program?

Now What?

Write or discuss your plan of action. How will you set expectations with your group? Will you use one of the examples presented or do you have another method? What elements from any of the examples shared in the video will be incorporated?
