

City of Saint Paul – Public Works Department Neighborhood Pavement Maintenance Work

Dear Saint Paul Resident or Business Owner,

The Saint Paul Public Works Department will be performing **street maintenance** on your block this week. The work will include **milling and asphalt overlay** and is scheduled as follows (weather permitting):

- **Milling:** Wednesday, September 24 – Friday, September 26
- **Overlay (new pavement surface):** Monday, September 29 – Wednesday, October 8

Access and Parking

During milling and overlay operations, **driveway access will be temporarily interrupted**. If you will need access to your vehicle, please park it on an adjacent side street **before 7:00 a.m.** on the scheduled project days.

Crews are expected to work between **7:00 a.m. and 7:00 p.m.** Barricades will be placed to close the street while work is in progress and removed once it is safe to reopen. Once barricades are removed, you may resume use of your driveway.

Purpose of the Project

This pavement maintenance is part of the City's ongoing street improvement efforts. By placing a fresh asphalt surface over the existing roadway, we are extending the life of the street and helping to delay more time-consuming and expensive repairs, such as repeated pothole patching in future years.

We appreciate your cooperation and patience while this important work is completed. For more information, please visit our website: www.stpaul.gov/departments/public-works/street-maintenance

Sincerely,
Saint Paul Public Works Department
