27 FEBRUARY 2016

Ice Cross Downhill has continued to boom across the world, setting the competitive bar for 2016's Red Bull Crashed Ice higher than ever. To stand victorious, racers are challenged to push the limits on a global scale — from Quebec City to Munich to Jyväskylä / Laajis. Entering the ranks through these first three stops required riders to go big every time they drop into the course. And now, taking home the gold demands a championship performance like no other in Saint Paul, USA. Because you can't be world champion unless you take on the world.
