

# PARQUE de CASTILLO WATER FEATURE

The splashpad will be a vibrant addition to Parque de Castillo. During large events, the water can be turned off and the paved area will serve community gathering events. There are multiple options for a theme on the ground plane of the splashpad to inspire the final design and configuration of seating and spray jets. The plan image below shows the spray features layed out in a 'sun pattern' to draw on the history of neighborhood as 'District Del Sol'.

Detail of Splashpad concept
