DRAFT Bike-Walk Central Corridor Action Plan

The City of Saint Paul is currently preparing a plan to create a safe and more inviting pedestrian and bicycle environment in Saint Paul's Central Corridor. The DRAFT of the plan is ready for public review. The DRAFT plan evaluates existing bike-walk conditions; makes recommendations to increase bicycling and walking and decrease reliance on the automobile; and prioritizes achievable projects for implementation in the near future.

Funding for the Central Corridor Bike-Walk Action Plan is provided by a grant from the Non-Motorized Transportation Pilot Program.

Draft Bikeway Framework.

We want your input!

Review the DRAFT Plan on-line

We want your feedback on the DRAFT Bike-Walk Central Corridor Action Plan. The DRAFT will be available on the City's website for public comment until February 27th, 2009. Your suggestions and insight will fine tune the plan recommendations and priorities. The final plan will be completed in March, 2009.

Draft Plan Highlights

Did You Know?

Increasing biking and walking in the Central Corridor is achievable!

- **25 % of all trips are one mile or less of our home.**
- **40 % of all trips are within two miles of our home**
- **82 % of those short trips are made by car.**

Traffic Calming does increase pedestrian safety!

Vehicle Speed (MPH)	Pedestrian Survival Rate
20	95 %
30	55 %
40	15 %

Bike Recommendations

- A bikeway network of regional, commuter and local bikeways that link LRT stations to the region and facilitate movement within the Central Corridor
- Bike storage and support facility recommendations
- Wayfinding strategy and recommendations

Walk Recommendations

- Infill missing sidewalks in west Midway area
- Bridge and streetscape improvements in key locations
- Traffic calming strategies
- Wayfinding recommendations
- Promotion, education and special events to increase bike walk issue awareness

Education and Awareness

- Hire bicycle, pedestrian, and complete streets coordinators
- Prepare city-wide bikeway route in paper and digital format
- Create a mobile recreation and outreach for biking and walking
- Hold events such as vehicle road closure days

Before and after photo simulation of the intersection of a local and commuter bikeway
