December 8, 2016

Josh Williams, Senior Planner  
City of Saint Paul  
25 West 4th Street  
St. Paul, MN 55102

Dear Josh:

At its regular meeting on December 7, 2016, the Union Park District Council Board unanimously endorsed the following resolution:

“The Union Park District Council supports the City of St. Paul continuing the City’s process of the South Snelling Zoning Study as it proposes changes in zoning to T2 and T3 in Union Park.”

I look forward to hearing about additional opportunities for public input throughout this process. Thank you for your work on this project!

Sincerely,

Julie Reiter  
Julie Reiter, Executive Director  
Union Park District Council
Resolution Supporting the South Snelling Avenue Re-Zone

Whereas the Saint Paul Comprehensive Plan, adopted in 2009, designates Highland Park as a Neighborhood Center, an area with compact, mixed-use development that provide services and employment close to residences;

Whereas the District 15 Highland Park Neighborhood Plan, adopted in 2007, includes an action to rezone Snelling Avenue to TN2 to support mixed-use development, appropriate building design and encourage pedestrian-friendly street elements, plentiful landscaping and first-floor retail development; and

Whereas the Saint Paul Planning Commission initiated a zoning study of South Snelling Avenue from Ford Parkway to Interstate 94 to be conducted by Saint Paul Planning and Economic Development staff in July of 2015;

Whereas Saint Paul Planning and Economic Development staff met with the Highland District Council’s Community Development Committee to inform and gather feedback on the draft zoning study in October and November of 2016;

Whereas Saint Paul Planning and Economic Development and the Highland District Council’s Community Development Committee hosted public meetings with Highland Park property owners, business owners, and residents on the topic of rezoning South Snelling Avenue on October 4, and October 18, 2016.

Whereas the Saint Paul Planning Commission will hold a public hearing on the draft Snelling Ave Zoning Study on May 19th, 2017; therefore

Be it resolved that the Highland District Council supports the proposed rezoning as presented by the City of St Paul on April 18, 2017 from the Snelling/Randolph intersection to the Snelling/Ford intersection, to support mixed-use development, provide design standards that limit the visual impacts of parking, maintain attractive building facades and promote pedestrian-friendly streetscapes.

Approved May 04, 2017
By the Highland District Council Board of Directors

Resolution 2017-08D

The Highland District Council’s mission is to foster opportunities for the people that live, learn, work, and play in Highland Park to engage and connect with neighbors, businesses and local government and to help build a more vibrant, welcoming, and safe neighborhood. The HDC is a registered 501(c)3 non-profit.
May 15, 2017

Mr. Josh Williams  
Department of Planning and Economic Development  
City of Saint Paul  
25 W. Fourth Street  
Saint Paul, MN 55102

Mr. Williams:

On May 11, 2017, the Board of Directors of the Macalester-Groveland Community Council ("MGCC") held a public meeting, at which it considered a recommendation from its standing Housing and Land Use committee.

On April 26th, 2017, the Housing and Land Use Committee ("HLU") of the Macalester Groveland Community Council ("MGCC") held a public meeting, at which it considered the rezoning recommendations for Snelling Ave South as proposed by the City of Saint Paul Planning Commission. City staff were present to discuss and answer questions. Additionally, city staff have appeared before the committee at two prior meetings on this topic. Prior to the meeting, one comment was received in opposition to the rezoning recommendations. At the meeting, attendees spoke in favor of and in opposition to the recommendations.

After consulting the Macalester-Groveland Long Range plan, considering neighborhood feedback and assessing the merits of the proposal, the MGCC passed the following resolution as recommended by its HLU committee:

***The Macalester-Groveland Community Council supports the recommendations in the South Snelling Zoning Study and strongly encourages the City to better define ‘mixed use’ in Traditional Neighborhood Districts."***

Important to the HLU’s discussion, were the following considerations:

- The proposed rezoning classifications align with the Macalester-Groveland Community Council Plan, which is an adopted amendment to the City of Saint Paul Comprehensive Plan. Specifically, the recommendations support the following strategies:
  - **H2.5** Support multi-unit mixed-use development in the following corridors: Snelling Avenue, Grand Avenue, St. Clair Avenue, and Randolph Avenue.
  - **LU1** Support land use that preserves Macalester-Groveland as a uniquely connected, walkable, mixed-use sustainable neighborhood with a pedestrian-oriented human-scale streetscape.

o **LU1.1** Maintain and/or establish zoning that encourages compact development along residential/mixed-use corridors that incorporates a mix of uses (commercial, residential, office, intergenerational housing, etc.).

o **LU1.2** Maintain and/or establish zoning that encourages higher-density (taller) development at the intersection of residential/mixed-use corridors and lower-density (shorter) development at mid-block of residential/mixed-use corridors.

o **LU1.3** Maintain and/or establish zoning that preserves lower-density, single family homes and duplexes outside of residential/mixed-use corridors.

If you have questions or concerns, please do not hesitate to contact me.

Liz Boyer  
Executive Director  
Macalester-Groveland Community Council

cc (via email): Ward 3, City of Saint Paul
Hello,
I just wanted to say I love the plan to rezone Snelling Ave. I think opening up housing and commercial options would help grow this corridor. My only recommendation would be to lower to lower the speed limit to 25mph but that's out of the bounds of this study and the planning commission I believe.

Sincerely,
Robert Wales

Donna Drummond,

Re: Snelling Avenue South Zoning Study

I am writing to encourage the St. Paul Planning Commission’s approval and adoption of the Snelling Avenue South Zoning Study without modification.

In order to thrive, St. Paul needs to be willing to change existing zoning and development so that it promotes a more livable and prosperous city in which its citizens are able to live, work and play in their own neighborhoods.

The current study encourages growth along the Snelling Avenue corridor by zoning for mixed-use commercial and multi-unit housing options in such a way that would:

- Not overly impact existing neighborhoods or overburden existing infrastructure
- Allow new residents to take advantage of living in a desirable community in St. Paul
- Bring more people to existing businesses along the corridor and expand opportunity for new commercial growth along Snelling Avenue
- Promote existing transportation options and allow for opportunities to expand public transit

I encourage you to vote “Yes” on this study so that it may be implemented in order to make the Snelling Avenue corridor a more livable community in which residents and businesses can thrive.

Thank you,

Robert Wales

Hi Josh,
I just wanted to send a quick email to say that I fully support increased density and the re-zoning of Snelling avenue. Please know that many people in the neighborhood are excited for a new apartment building at St Clair / Snelling, and for increased density in general along Snelling. I live just a couple of blocks away, and welcome the LeCesse development, particularly if they're able to include retail in addition to residential.

Thanks for your work,
Jenny Werness
St Clair Ave & Hamline
Hi Tony,
I just wanted to extend my thanks for the work that's being done on rezoning Snelling avenue. The city's plan looks fantastic, and I'm excited to see greater density in my area, especially along such a major corridor. I'm just a couple blocks from Snelling, and often walk to shops there (and to the A-line). I'd love to have even more commercial and residential in the neighborhood.

I'd also like to note that the city's rezoning plan has gotten a ton of positive comments on local neighborhood groups (facebook and nextdoor), though I imagine most of us haven't contacted you directly. Know you have a lot of support in the neighborhood.

Thanks,
Jenny Werness

Mr. Johnson,

I am unable to make it to tomorrow's meeting but wanted to voice my support for the rezoning of Snelling! I live in Mac Groveland and had the pleasure of listening to two city reps at last month's Housing and Land Use Committee meeting. Snelling is a perfect fit for higher density and I fully support this plan.

Thank you for your work on this!

Kateri Routh
2093 Stanford Ave.
Sr. Paul, MN
Hi Tony,
I was not able to make it to the meeting today, but wanted you to know that I support up-zoning and increased housing density on Snelling.
Thank you!

Tyler Teggatz
2031 Itasca Ave
Hi Tony,

I just saw the rezoning plan for Snelling. I can't make the meeting on Friday, that's right when I'm getting kids off to school. However, I want to express my strong support for what you're doing for our neighborhood and this city.

I know the zoning committee has been doing research for awhile, but I've only just started. I just discovered the studies that set a minimum of 4200 people per square mile as the density at which public transit and multi-modality (walking and bikes) becomes the most efficient. Glad to see the City is looking to the needs of the future and being proactive about sustainability.

I also really appreciate the work that is making our streets destinations, not just thoroughfares.

Please keep up the great work! I'm sure, as with any job that advocates progress and change, the loudest voices are often coming from fear and knee jerk antidotal concerns. Stay the course of progress that leads Saint Paul into a sustainable community built for people, not just cars.

Cheers,

Katie Daigh

Subject: Support for LeCessee Development

Dear Members of the Planning Commission:

I am a neighbor that lives close to the intersection of St. Clair and Snelling, where the LaCessee Development is being considered. I am in full support of re-zoning the area to T3, which would enable a taller structure than its current zoning allows. I am interested in this from two perspectives: I want to live in a vibrant neighborhood with interesting businesses that I can walk to. I already frequent other establishments on corners opposite and next door to the proposed building. From an environmental perspective, I am in favor of denser housing developments which save energy, preserve farmland, and encourage public transport. I would like to see the design of the building incorporate some space for commerce on the first floor.

Sincerely,

Christina Ewig

Donna Drummond,

Re: Snelling Avenue South Zoning Study

Below is a form letter provided to me by Sustain Ward 3. I've reviewed it and the zoning plan and am excited by the opportunities it can provide. Having worked at Macalester College for 12 years and now living in Saint Paul, I know that density is an important contributor to a flourishing city. It is also an important element in addressing global climate change on a local level.

I am writing to encourage the St. Paul Planning Commission's approval and adoption of the Snelling Avenue South Zoning Study without modification.

I am writing to encourage the St. Paul Planning Commission’s approval and adoption of the Snelling Avenue South Zoning Study without modification.

In order to thrive, St. Paul needs to be willing to change existing zoning and development so that it promotes a more livable and prosperous city in which its citizens are able to live, work and play in their own neighborhoods.

The current study encourages growth along the Snelling Avenue corridor by zoning for mixed-use commercial and multi-unit housing options in such a way that would:

• Not overly impact existing neighborhoods or overburden existing infrastructure
• Allow new residents to take advantage of living in a desirable community in St. Paul
• Bring more people to existing businesses along the corridor and expand opportunity for new commercial growth along Snelling Avenue
• Promote existing transportation options and allow for opportunities to expand public transit

I encourage you to vote “Yes” on this study so that it may be implemented in order to make the Snelling Avenue corridor a more livable community in which residents and businesses can thrive.

Thank you,

Hi Josh,

I'm a Union Park home owner. I support high density redevelopment along Snelling Avenue. Specifically, the St. Clair/Snelling corner desperately needs change. The city should be a good partner to help secure private investment on this block while encouraging pedestrian oriented design and mixed uses.

Hi Josh,

I just wanted to voice my support for the increased density and Snelling and St Claire. It's critical to ensure that we have enough housing in these neighborhoods to support population growth in the metro region. I would rather give the developer the density they want to make the project happen, and leverage that in exchange for increased affordability or green space. My only concern is keeping rent relatively affordable. Currently, it seems that demand is outpacing supply, so it seems that more density will lead to more housing, and ultimately keep St. Paul a place people will be able to afford to live.

Thanks.

829 Laurel Ave, St Paul

Donna Drummond,

Re: Snelling Avenue South Zoning Study

Please approve and adopt the Snelling Avenue South Zoning Study without modification.

St. Paul is a wonderful city, but we need to prepare for the future. Our zoning and development patterns should promote a more livable and prosperous city in which its citizens are able to live, work and play in their own neighborhoods.

The current study encourages growth along the Snelling Avenue corridor by zoning for mixed-use commercial and multi-unit housing options. Let's face it St. Paul needs to address a few things:
* We need more property tax wealth.
* We need to welcome more new residents at all income levels.
The plan does this without imposing an undue burden on existing neighborhoods and existing infrastrucutre.

The plan will also bring more people to existing businesses along the corridor and expand opportunity for new commercial growth along Snelling Avenue. This expands the city's property tax capacity and increases the amount of sales tax we collect.

Finally, if we want to get serious about addressing climate change - which I think we all do--we need make land use and transportation decisions that promote walkability and public transit. This plan does that.
Please vote “Yes” on this study! Let make the Snelling Avenue corridor a more livable community in which residents and businesses can thrive and grow!

Donna Drummond,

Re: Snelling Avenue South Zoning Study

The St. Paul Planning Commission should approve and adopt the Snelling Avenue South Zoning Study without change.

Unless there is a direct threat to health and safety, local government power should never be used to keep out those who want to build homes and businesses in our city.

The aesthetic and emotional preferences of current residents should carry little or no weight compared to the essential needs of others to have more affordable places to live and work.

Finally, if we allow higher density growth on Snelling, we will maximize and make more self-sustaining the mass transit investments we already made in the Snelling Ave corridor.

I encourage you to vote “Yes” on this study so that it may be implemented in order to make the Snelling Avenue corridor a more livable community in which residents and businesses can thrive.
