Winter Collection Guide

During the winter months, bad weather, such as icy or heavy snow conditions, may occasionally present problems for your weekly recycling collection. Problems may occur in isolated areas, such as a single street or alley. At other times, major weather events may cause widespread collection problems or delays. The City does not plow alleys. Please work with your neighbors to keep your alley accessible.

What to do if you experience a winter collection delay:

1. If there are widespread winter recycling collection delays, the City will post information online at stpaul.gov/wintercollection.
2. If your recycling is not collected, contact Eureka Recycling at 651-222-7678, visit EurekaRecycling.org, or use their free app.
3. If the recycling truck is not able to access your cart(s) on an alley or street due to icy or heavy snow conditions, they may return within 24 hours to make a second attempt to collect. **Please leave your cart(s) out and accessible at your collection location.**
4. If the alley or street remains inaccessible, **Eureka Recycling will be back next week on your regularly scheduled collection day.**
5. If the alley or street continues to experience collection issues during the winter, **we will work with you and your neighbors to get your collection back on track.**
