

CITY OF SAINT PAUL

CAPITAL IMPROVEMENT BUDGET COMMITTEE

2027 Committtee Recommendations to The Mayor

stpaul.gov/CIB | engagestpaul.org/cib2026

The 2026 Capital Improvement Budget (CIB) [Community Proposal Process](#) recommends funding for budget years 2026 – 2028 and works to implement recommendations from [the City Council Audit Committee with Wilder Research](#) and the community, prioritizing improvements which impact the experience of community member applicants, such as simplifying the application, providing additional ways to submit ideas, and improving communication and promotion of technical assistance.

Contact: Joe Harney

Description: To set aside a portion of the Capital Improvement Bond proceeds for unforeseen budget needs such as new project cost overruns and matches to grant received.

Justification: Some contingency funds will be needed throughout the budget year. This allocation - at approximately 1.5% of CIB Bond proceeds - provides an adequate reserve.

Financing Source	Priors	2026 Adopted	2027 Recommended	2028 Tentatively Recommended	2029 Tentatively Recommended	2030 Tentatively Recommended	Total (not including priors)

Citywide Long-Term Capital Maintenance Program*

General Government (Office of Financial Services)

Location: Citywide

District(s): Citywide Ward(s): Citywide

Contact: Joe Harney

Description: The Capital Improvement Budget process sets aside funds each year maintenance work on City-owned facilities which are reviewed and selected for funding by the CIB Committee in odd years.

Note: Funding for citywide capital maintenance projects was increased in the 2022 amended budget to reflect the additional capital improvement bond financing made available by funding the North End Community Center and Fire Station 7 projects with sales tax bonds.

Justification: The purpose of this program is to provide a fund to be utilized under specified eligibility guidelines for the repair, replacement, renovation, remodeling, and/or retrofitting of the structural parts and/or service system components of an improved site. This program is necessary to protect the City's investment in its public facilities.

Community Proposals*

General Government (Office of Financial Services)

Location: Citywide

District(s): Citywide Ward(s): Citywide

Contact: Joe Harney

Description: The Capital Improvement Budget process sets aside \$500,000 per year for community-submitted projects which are reviewed and selected for funding in even years.

Justification: In order to reduce competition between submissions from City departments and community organizations, the new CIB process includes a separate fund for community-led projects.

Transfers to Debt Service Fund*

General Government (Office of Financial Services)

Location: Citywide

District(s): Citywide Ward(s): Citywide

Contact: Joe Harney

Description: Transfer of interest earnings from prior years' capital improvement bond accounts and project balances from completed projects to capital improvement bonds debt service account.

Justification: Excess interest earnings and project balances are available in the capital improvement bond accounts and are eligible to be used for debt service on outstanding bonds, thereby avoiding an increase in the tax levy for debt service.

Libraries

Transforming Libraries: Hayden Heights Library Renovation

Libraries

Location: Hayden Heights Library - 1456 White Bear Ave., St. Paul, MN 55106

District(s): 02 Ward(s): 06

Contact: Maureen Hartman

Description: Through its Transforming Libraries project, Saint Paul Public Library will renovate the Hayden Heights Library to position it as a community resource hub that will support the rapidly evolving East Side of Saint Paul.

Justification: The Hayden Heights Library is a critical East Side resource that has not had any significant updates in over 40 years. Renovating this City asset will allow for increased services and support of this growing neighborhood and increase accessibility, safety, flexibility and belonging.

Transforming Libraries: Riverview Library Renovation

Libraries

Location: Riverview Library - 1 E. George St., St. Paul, MN 55107

District(s): 03 Ward(s): 02

Contact: Maureen Hartman

Description: Through its Transforming Libraries project Saint Paul Public Library (SPPL) will renovate the historic Riverview Library to maintain its storied character and establish it as a resource-rich community space that is welcoming, accessible, flexible, and reflective and inclusive of the neighborhood.

Justification: The Riverview Library is an historic Carnegie Library built in 1917 that has only received two significant updates in its lifespan, with the last being nearly 40 years ago. This renovation will focus on critical updates and additions to the library to increase accessibility, safety, flexibility, belonging and sustainability.

Parks and Recreation

Asphalt Restoration and Replacement Program*

Parks and Recreation

Location: Citywide

District(s): Citywide Ward(s): Citywide

Contact: Brad Meyer

Description: The program was first established in the 1996-97 budget to systematically resurface, seal coat, and/or repair the over 250 miles of paved paths and trails in the City's park system, including paved sites, building access routes, and parking lots. This investment focuses on the worst condition items and needs with a focus on addressing as many that funding will allow.

Justification: As asphalt paving on the Parks Department's system paths, trails, access routes, and parking areas continues to age, it develops cracks, surface roughness, and degradation. This necessitates the need for areas to be resurfaced or replaced in order to keep areas in an attractive, safe, usable condition, and to avoid accessibility issues. The oldest paving in the system is over 25 years old. Use of Park facilities, walking, hiking, and bicycling activities, continues to increase in popularity and all require safe and smooth access. The Asphalt Restoration and Replacement program serves a dual purpose in providing funding to maintain surfaces that are in good condition but showing areas of wear and also serving as a means to replace areas that are beyond repair. The program has been funded annually since 1996. The Parks department has managed the funding in the past to do some of the trails in phases.

Baker Park Play Area

Parks and Recreation

Location: 209 Page Street

District(s): 03 Ward(s): 02

Contact: Brad Meyer

Description: Renovate existing play area to current safety and accessibility guidelines at Baker Park. Work to include updated site amenities including seating, lighting, and landscaping.

Justification: The funding will be used to remove and replace the existing play area as well as address needed site lighting and site furnishings. The current play area is 13 years old and is in need of replacement. Baker Park is ranked #3 out of 75 play areas for replacement.

Children's Play Area Improvements*

Parks and Recreation

Location: Citywide

District(s): Citywide Ward(s): Citywide

Contact: Brad Meyer

Description: Program funds the repair and replacement of play area equipment throughout the department.

Justification: There are 80 children's play areas within the City of Saint Paul's Parks system; almost 20% need to be replaced while many others require retrofitting and/or renovation of their play components. The Children's Play Area Program will provide resources not otherwise available to Parks and Recreation. In addition, this program will make it possible to update all or parts of the play areas that have equipment failures and safety issues, thus extending their useful life.

Due to the age and condition of many of the play areas in the system, maintenance staff generally spend a great deal of time keeping them safe and in working order. Replacement of critical play area components would reduce the number of hours required to repair or replace worn out, broken, or missing components. Also, the addition of components that meet current CPSC and ADA guidelines will reduce the number of potential injuries and provide accessibility for children of all abilities.

For the most part, the projects completed under the Children's Play Area Program are either a complete repair or retrofit on an existing section of a play area. The repairs are not staged and upon completion bring the play area back into safety compliance.

City 1% Sales Tax Parks**

Parks and Recreation

Location: Citywide

District(s): Citywide Ward(s): Citywide

Contact: Brad Meyer

Description: Each year, Saint Paul parks, trails, and recreational facilities attract more than 15 million visitors from all over the country. The average building is approaching 40 years, and coupled with years of deferred maintenance, the aging facilities are deteriorating.

Justification: The revenue collected over 20 years will provide \$246 million for improvements and upgrades Parks and Recreation facilities throughout the city. This investment would revitalize aging parks infrastructure with a focus on the worst-condition parks, community centers, trails, connections, and athletic facilities.

This project reflects anticipated revenue collected annually from the City 1% Sales Tax. Initial sales tax receipts are recorded here. Funding is then distributed to eligible construction projects. Therefore, City 1% Sales Tax revenue appears twice in the budget, once where collected, and again where budgeted as a City 1% Sales Tax construction project.

**City 1% Sales Tax revenue appears twice in the budget: where collected, and as a City 1% Sales Tax construction project.

Citywide Tree Planting Program*

Parks and Recreation

Location: Citywide

District(s): Citywide Ward(s): Citywide

Contact: Brad Meyer

Description: The annual citywide tree planting program/project provides for the addition or replacement of trees on boulevards and park land lost due to disease, age, storm damage, construction, drought, or other causes.

Justification: This CIB annual program is a primary source of funding for reforestation on city streets and parkland that funds the replacement of approximately 550-650 trees annually. As a regular, existing program, it supplements Forestry General Fund dollars to replace trees lost across the city. On average, 2,200 trees are removed annually, this can be several hundred more during years with major storms.

The city-wide tree planting contract is solicited as a master contract annually and the awarded contractor plants trees during the spring and fall seasons. During the spring, mid-April to mid-June, approximately two thirds of the annual allotment is planted. The remaining one third is planted in the fall season, from early October to mid-November.

Outdoor Court Restoration Program*

Parks and Recreation

Location: Citywide

District(s): Citywide Ward(s): Citywide

Contact: Brad Meyer

Description: An annual program to systematically resurface or replace outdoor courts within our system. Outdoor courts provide valuable recreational opportunities to the public and need a systematic program to rebuild/resurface them to keep in a safe and usable condition.

2026 planned projects (funding paired with 1% sales tax funding) – Replacing futsal court at Hamline Park, constructing basketball at Daytons Bluff and court enhancements at Conway Recreation Center.

Next priorities include: Removing the tennis court at Indian Mounds Regional Park, replacing the tennis courts at Desnoyer Park and replacing the tennis and basketball courts at Mounds “Maintenance” Park.

Justification: This program continues to recondition/replace recreational tennis and basketball courts throughout the City. Parks and Recreation has conducted a study and developed a system-wide ranking of courts to be replaced. We utilize this information and other relevant data to determine which courts are to be replaced.

Park and Library Capital Asset Revitalization*

Parks and Recreation

Location: Citywide

District(s): Citywide Ward(s): Citywide

Contact: Brad Meyer

Description: Provide resources for the maintenance of the City's libraries and recreation facilities in need of repair, upgrade, and reconfiguration to adjust shifting use. This allows the city to look at shared square footage and respond to change needs and uses inside the facilities. This investment focuses on the worst condition items and needs with a focus on addressing as many that funding will allow.

2027 planned projects (funding paired with 1% sales tax funding) – Oxford Recreation main entrance security improvements, Dayton's Bluff Auditorium lighting and sound repairs, and flooring at Martin Luther King Recreation Center.

Next priorities include - Path coating at Phalen and Palace refrigerated ice rinks, kitchen updates at Dayton's Bluff and Battle Creek Recreation Centers, and security lighting and cameras at West Minnehaha.

Justification: The City's Capital Maintenance Program serves all City Departments and addresses very specific maintenance needs. Many important Park and library needs fall outside of the scope of Capital Maintenance funding and this funding request will provide funding specifically for the repair and renovation of Libraries and Parks facilities to ensure that they remain safe and attractive public venues. A comprehensive evaluation of the Park System will guide how to most efficiently and cost effectively utilize these funds.

Parks Grant Prep/Preliminary Design Program*

Parks and Recreation

Location: Citywide

District(s): Citywide Ward(s): Citywide

Contact: Brad Meyer

Description: Continues the program established in the 2008-09 budget to provide preliminary design services and assistance for community projects and grant preparation, including CIB and CIP preparation by the professional design staff within Parks and Recreation.

Justification: There has been a significant increase in the scope and quantity of proposals requiring design staff to provide professional design expertise for projects which are in the very early stages of planning and are as yet unfunded. Administrative services such as CIB proposal and cost estimate preparation, as well as necessary research and provision of materials such as mapping and graphics necessary to supplement grant submittals are also necessary services. In addition, many new mandated programs such as storm water regulation, Public Art Policy, Parkland Dedication Ordinance, and the new Sustainable Policy require additional staff expertise. This program will continue to allow design staff to provide this critical planning and design assistance required for these priority City projects and policies.

This fund allows staff to advise and make sure approved city design and building principles are included in all projects. This fund also allows staff to make sure approved principles are included in all proposed projects, especially through the City site plan review process, watershed district mandates, and all city projects.

*Project is an Annual Program

Revitalize Asphalt

Parks and Recreation

Location: Citywide

District(s): Citywide Ward(s): Citywide

Contact: Brad Meyer

Description: Replace and improve parking lots, trails and sidewalks across system. Supplement to annual asphalt fund. Project priorities to be informed by pavement condition rating and addressing critical failures.

2026 planned projects (funding paired with CB funding) – Replacing the boardwalk/pathways at Hidden Falls Regional Park, pathway/sidewalks at Conway Rec Center, pathway/sidewalks at Phalen Recreation Center and stairs/walkway at Valley Rec Center.

Next priorities include: Replacing the sidewalks at Langford, Eastview, Hazel Park, and West Minnehaha Rec Centers and refreshing various trail segments near Lake Como and MRB.

Justification: Revitalize and improve aging infrastructure focusing investment on the worst condition locations to meet the growing service demand.

Revitalize Buildings & Parks

Parks and Recreation

Location: Citywide

District(s): Citywide Ward(s): Citywide

Contact: Brad Meyer

Description: Funding will focus on maintenance needs related to doors, roofs, HVAC, gyms, lighting and other building/park needs. Project priorities to be informed by Ameresco Data and addressing critical failures.

2027 planned projects (funding paired with CIB funding) – Highland Park Aquatic Center pool resurfacing and Harriet Island stage remodel.

Next priorities include - Roof at North Dale Recreation Center, Como Zoo Entablatures, Como Pool walkways, windows and door replacements at West 7th Community Center, HVAC upgrades at Dayton's Bluff, Hayden Heights and Martine Luther King/Hallie Q Brown Center.

Justification: Revitalize and improve aging infrastructure focusing investment on the worst condition buildings and parks to meet the growing service demand.

Revitalize Courts

Parks and Recreation

Location: Citywide

District(s): Citywide Ward(s): Citywide

Contact: Brad Meyer

Description: Improve existing basketball and tennis courts. Use court assessment data along with System Plan recommendations for potential court conversions to pickleball.

2026 planned projects (funding paired with CIB funding) – Replacing futsal court at Hamline Park, constructing basketball at Daytons Bluff and court enhancements at Conway Recreation Center.

Next priorities include: Removing the tennis court at Indian Mounds Regional Park, replacing the tennis courts at Desnoyer Park and replacing the tennis and basketball courts at Mounds “Maintenance” Park.

Justification: Revitalize and improve aging infrastructure focusing investment on the worst condition courts to meet the growing service demand.

Revitalize Fields

Parks and Recreation

Location: Citywide

District(s): Citywide Ward(s): Citywide

Contact: Brad Meyer

Description: Improve field that have exceeded useful life. Replace failing synthetic turf. Remaining priorities based on data gathered on field condition, usage, and future uses.

2026 planned projects – Renovating and improving the fields and surrounding park amenities at McMurray Park, Baker, Groveland, Linwood and Merriam Park Rec Centers and rejuvenating the fields at North Dale Rec Center.

Next priorities include: Improving the fields and surrounding park amenities at Highland Park Community Center and rejuvenating the fields at Edgumbe, Phalen Rec, and West Minnehaha Rec Centers.

Justification: Revitalize and improve aging infrastructure focusing investment on the worst condition fields to meet the growing service demand.

Revitalize Play Areas

Parks and Recreation

Location: Citywide

District(s): Citywide Ward(s): Citywide

Contact: Brad Meyer

Description: Improve play areas that have exceeded their useful life. Use tot lot assessment along with other funding sources to determine locations.

2026 planned projects – Universally Accessible Play Area at Victoria Park

Next priorities include: Replacing play areas at Douglas Park, Battle Creek Rec Center, Newell Park, Tilden Park, Orchard Park, North Dale Rec Center, Hancock Rec Center, Highland Picnic Shelter, Dousman Park, Aldine Park, Phalen Rec Center, Arlington Hills Community Center, Langford Rec Center, Edgcumbe Rec Center and West Minnehaha Rec Center.

Justification: Revitalize and improve aging infrastructure focusing investment on the worst condition play areas to meet the growing service demand.

West Minnehaha Play Area

Parks and Recreation

Location: 685 West Minnehaha Ave

District(s): 07 Ward(s): 01

Contact: Brad Meyer

Description: Renovate existing play area to current safety and accessibility guidelines at West Minnehaha Park. Work to include updated site amenities including seating, lighting, and landscaping.

Justification: The funding will be used to remove and replace the existing play area as well as address needed site lighting and site furnishings. The current play area is 15 years old and is in need of replacement. West Minnehaha Park is ranked #25 out of 75 play areas for replacement.

10 Home Restorations in St Paul

Planning and Economic Development

Location: Citywide

District(s): Citywide Ward(s): Citywide

Contact: Beth Ulrich

Description: Hearts & Hammers will complete 10 exterior home restoration projects for low-income seniors, disabled adults, and veterans in St. Paul . These projects will enhance home safety, accessibility, and curb appeal, ensuring that homeowners can continue living independently in their communities.

Justification: These homes belong to low-income seniors, disabled adults, and veterans who are unable to afford or complete necessary exterior home improvements.

Acquisition Fund for Community Investment

Planning and Economic Development

Location: Citywide

District(s): Citywide Ward(s): Citywide

Contact: Tara Beard

Description: The Acquisition Fund is designed to strategically acquire vacant lots, hazardous and/or blighted buildings for reuse, or to acquire structures in need of rehabilitation.

Justification: Through this program, the Department of Planning and Economic Development and the Saint Paul Housing and Redevelopment Authority, acquire strategic, hazardous, or blighted properties for reuse. The resulting properties may be utilized for infill single family home construction, combination with a larger commercial or housing development, used as green space/garden lots or sold to adjacent property owners if the lot is too small for development, or to rehabilitate existing structures. A primary purpose is to support investment in community assets, reduce blight, and returning property to active, productive uses.

Business Investment Fund

Planning and Economic Development

Location: Payne Street and Arcade Avenue

District(s): 05 Ward(s): 06

Contact: Beth Ulrich

Description: East Side Neighborhood Development Company (ESNDC) supports economic revitalization on St. Paul's East Side by assisting commercial property owners with rehabilitation. Through the Business Investment Fund (BIF), it provides forgivable loans for storefront improvements and code compliance. Focusing on Payne Avenue, Arcade Street, Maryland Avenue, and East 7th Street, as well as parts of Districts 4 and 5, ESNDC offers financial and technical assistance to enhance business viability.

Justification: Funds will be used for façade improvements and code compliance, including upgrades like storefront windows, doors, signage, lighting, and correcting interior code violations related to health and safety. This program will primarily benefit BIPOC-owned businesses in low-income areas and support job creation and commercial revitalization. ESNDC will also prioritize CERT-listed contractors to ensure equitable economic impact and will leverage additional resources to maximize outcomes.

Citywide 30% AMI Housing Program

Planning and Economic Development

Location: Citywide

District(s): Citywide Ward(s): Citywide

Contact: Jules Atangana

Description: The Department of Planning and Economic Development (PED) and the Housing and Redevelopment Authority (HRA) will finance the production and preservation of deeply affordable multi-family housing affordable to extremely low-income households at or below 30% of Area Median Income (AMI).

Justification: Funds will serve residents of Saint Paul, with a primary objective to serve extremely low income residents, defined as those with incomes at or below 30% AMI, which are disproportionately communities of color that have been left out of the wealth building process and have the fewest housing options available. The projects funded by this program will serve families, seniors, low-income single adults, and homeless residents.

East Side Home Improvement Revolving Loan Fund

Planning and Economic Development

Location: Dayton's Bluff Payne/Phalen Greater & South East Side neighborhood

District(s): 01,02,04,05 Ward(s): 02,05,06,07

Contact: Beth Ulrich

Description: The East Side Revolving Loan Fund 's primary purpose is to provide low interest loans and construction management services to low income homeowners in the Dayton's Bluff, Payne Phalen, Greater East Side and South East neighborhoods.

Justification: maintain and/or improve their homes.

Financing Source	Priors	2026 Adopted	2027 Recommended	2028 Tentatively Recommended	2029 Tentatively Recommended	2030 Tentatively Recommended	Total (not including priors)

East Side Homeownership Initiative

Planning and Economic Development

Location: Dayton's Bluff Payne Phalen & Greater East Side Neighborhood

District(s): 02,04,05 Ward(s): 02,05,06,07

Contact: Beth Ulrich

Description: Through the East Side Homeownership Initiative, DBNHS will construct 6 new single family homes on existing scattered site vacant lots in Dayton's Bluff, Payne Phalen and Greater East neighborhoods, and sell the houses to low and very low income households.

Justification: DBNHS will build 6 single family homes (3 per year) on existing vacant lots. All of these homes will have at least 3 bedrooms with build out space in the lower level to accommodate larger household sizes. The CDBG funds combined with other sources will be used as "construction gap financing" to bridge the gap between what it costs to build a new house and what a new house will appraise for. When necessary, DBNHS will provide entry cost assistance, with our own funds, to make our houses affordable to the end buyers.

Housing Real Estate Multi-Unit Development Fund

Planning and Economic Development

Location: Citywide

District(s): Citywide Ward(s): Citywide

Contact: Jules Atangana

Description: The Department of Planning and Economic Development (PED) and the Housing and Redevelopment Authority (HRA) will finance the preservation and new production of affordable multi-family housing.

Justification: There are 22,335 renter households in Saint Paul with incomes at or below 30% AMI, and only 11,560 units affordable to these households, representing a shortage of nearly 11,000 units. This shortage most impacts communities of color, given that a significantly larger share of BIPOC residents have incomes at or below 30% AMI. Investments to create or preserve housing at the lower end of the income band in areas with rapidly increasing rents helps prevent displacement and the negative effects of gentrification.

Saint Paul Home Repair Loan Fund

Planning and Economic Development

Location: scattered site, Citywide

District(s): Citywide Ward(s): Citywide

Contact: Beth Ulrich

Description: NeighborWorks Home Partners' (NWHP) St. Paul Home Repair Loan Fund provides home repair loans and construction management services to help low-to-moderate income homeowners make health and safety repairs to their owner-occupied homes throughout the City of St. Paul with a focus on underrepresented neighborhoods and overall city-wide coverage and support.

Justification: Families who qualify for these funds meet HUD's definition of low to moderate income, less than 80% of the local area median based upon household size (number of people living in the home). This capital is used to fund loans for households that would likely not be able to receive a home repair loan from a traditional financial institution and, in order to keep these funds affordable, NWHP would not charge the homeowner any costs, including no closing costs or project management costs for this service.

Public Works

Arlington - Jackson to Payne

Public Works

Location: Arlington - Jackson to Payne

District(s): 05,06 Ward(s): 05

Contact: Anne Weber

Description: Street reconstruction on Arlington from Jackson Street to Payne Avenue including the federally funded Arlington Pedestrian Facilities Project.

Justification: This project is funded through the Common Cent Program. The project includes signals, utility work, sidewalks, curb and gutter and pavement.

The Arlington Pedestrian Facilities project includes sidewalk infill from Westminster Street to Edgerton Street. The City received federal funding for this project. A local match is needed to fund 20% of the construction as well as the engineering and inspection.

Capital City Bikeway Kellogg - W 7th to John Ireland

Public Works

Location: Kellogg Boulevard from West 7th Street to John Ireland

District(s): 17 Ward(s): 02

Contact: Anne Weber

Description: Provide engineering and local match funds for a federally funded project to construct a protected bikeway on Kellogg Boulevard between W7th Street and John Ireland Boulevard.

Justification: This bikeway is the last phase of the Capital City Bikeway (CCB) on Kellogg. The CCB is a network of approximately 5 miles of off-street trails throughout downtown Saint Paul that connects the regional destinations downtown with the existing trail network and residential locations throughout the City. The project includes sidewalks, pedestrian ramps, paving, signage/stripping, lighting, signal work and wayfinding. Utility work, grading, curb and gutter will be completed as necessary to construct the bikeway. The funding in 2024 will allow for the design to be started on this 2027 project.

Capital City Bikeway St Peter Wabasha Extensions

Public Works

Location: Wabasha from 7th to 11th
10th from Wabasha to St Peter
St Peter from 10th to 12th
12th from St Peter to John Ireland Boulevard
District(s): 17 Ward(s): 02
Contact: Anne Weber

Description: Provide engineering and local match funds for a federally funded project to extend the Capital City Bikeway on Wabasha to the Capitol.

Justification: The City received federal funding for this project. A local match is needed to fund 20% of the construction as well as the engineering and inspection. The project will expand the Wabasha Street bikeway, connecting it to the existing protected bicycle lanes on 10th Street before crossing Interstate 94 to connect with the Capitol grounds and the existing bikeway. The bikeway will continue to John Ireland Boulevard and the planned bikeway on Rice Street.

City 1% Sales Tax Public Works**

Public Works

Location: Citywide

District(s): Citywide Ward(s): Citywide

Contact: Anne Weber

Description: Saint Paul's arterial and collector roadways, bridges, and trail systems provide regional and national multi-modal connections for all different kinds of transportation. Approximately 200 miles of city-owned arterial streets connect users to the regional, state, and federal highway systems.

From initial construction to full reconstruction, roads have a lifecycle of about 60 years. Currently, Saint Paul streets are on a 124-year reconstruction cycle, more than double the average age of a functional road. According to a 2019 Pavement Condition Index (PCI) report conducted by Saint Paul Department of Public Works, the city-owned arterial and collector network has a current condition rating of 49 ("fair to poor").

**City 1% Sales Tax revenue appears twice in the budget: where collected, and as a City 1% Sales Tax construction project.

Justification: The revenue collected over 20 years will provide \$738 million for road improvement and reconstruction projects throughout the city, including 24 arterial and collector roads, including some bridges, over 44 miles in each of the seven wards. The arterial and collector street system's PCI will increase to an average of 70 ("satisfactory" condition) – an industry standard that governmental agencies strive to achieve.

This project reflects anticipated revenue collected annually from the City 1% Sales Tax. Initial sales tax receipts are recorded here. Funding is then distributed to eligible construction projects. Therefore, City 1% Sales Tax revenue appears twice in the budget, once where collected, and again where budgeted as a City 1% Sales Tax construction project.

Local Street, Alley, Sewer and Lighting Program*

Public Works

Location: Citywide

District(s): Citywide Ward(s): Citywide

Contact: Anne Weber

Description: Construct streets, alleys, storm sewers, sanitary sewers, and street lighting when petitioned by abutting property owners. This program is for when residents want to upgrade street lighting from wood pole lighting to lantern lights, improve an alley that is in poor shape, pave a gravel street, extend a storm or sanitary sewer, etc. These projects are typically 100% assessed. This program also assists residents and businesses that are located at corner properties that have already been assessed for capital improvements made to one side of their property. Properties are subject to long side subsidy as outlined in the City's Assessment Policy. This funding allows petitioned improvements to be made to the other side of their property without assessment. This type of work is not programmed or funded anywhere else.

Justification: This funding provides a line item in the budget for assessment funds for petitioned projects. Currently, this is the only funding source available to address infrastructure needs and improvements for corner-lot property owners who have already been assessed for improvements made to one side of their property.

Minnehaha - Payne to E7th

Public Works

Location:

District(s): Ward(s):

Contact:

Description: Provide engineering and local match funds for a federally funded project to reconstruct Minnehaha Street from Payne to East 7th.

Justification: The City received federal funding for this project. A local match is needed to fund 20% of the construction as well as the engineering and inspection. Improvements include modifying the existing four-lane undivided roadway to three lanes with on-road dedicated bike lanes and reconstructed sidewalk between Payne Avenue and E 7th Street. This will provide better use of the roadway corridor for safer bicycle and pedestrian travel.

Municipal State Aid Contingency*

Public Works

Location: Citywide

District(s): Citywide Ward(s): Citywide

Contact: Anne Weber

Description: To provide a funding source for Municipal State Aid (MSA) projects which, through unforeseen circumstances, exceed predicted costs. Also, to provide a funding source for the City's share of MnDOT projects that involve City facilities.

Justification: A funding source is needed for unforeseen MSA project costs created by the situation of predicting a project's scope and cost one to two years before design. The design process often reveals the need for more extensive work than was originally planned, and inflation rates for construction work that are extremely difficult to predict.

Financing Source	Priors	2026 Adopted	2027 Recommended	2028 Tentatively Recommended	2029 Tentatively Recommended	2030 Tentatively Recommended	Total (not including priors)

*Project is an Annual Program

Pedestrian and Traffic Safety Program*

Public Works

Location: Citywide

District(s): Citywide Ward(s): Citywide

Contact: Anne Weber

Description: This program will be utilized to provide safety improvements at various intersections and locations throughout the City to promote alternate means of transportation such as walking and bicycling as a healthy and more active lifestyle, and develop and implement projects and activities that improve safety and reduce traffic, fuel consumption, and improve air quality.

Funding will be used to install bike lanes, pavement markings and signs, and install bicycle racks in sidewalk areas to recognize and encourage bicycling as a viable transportation mode. At signalized intersections, funding will be utilized to install pedestrian countdown timers, audible pedestrian signals and new pedestrian ramps to meet current design standards. A variety of neighborhood traffic calming techniques such as pedestrian refuge islands, street narrowing, chokers (bump outs), diverters, traffic circles, street closures, signing, pavement markings, median islands, and dynamic speed limit display signs can be used to calm traffic and increase safety. These techniques must be tailored for a particular problem.

Justification: Improving the bicycle and pedestrian facilities existing in the City of St. Paul will encourage walking and bicycling use. These safety improvements will help to mitigate congestion, free up parking spaces; improve resident's health, conserve our energy resources; and improve the City's livability. Quality facilities, which can be used for recreation and transportation, are very popular amenities for urban areas such as Saint Paul. Improving pedestrian and bicyclist safety on our streets, in our neighborhoods, and around our schools is a major concern throughout the City of St. Paul. This program allows for the installation of a variety of safety measures, facilities and improvements that allows Public Works to be responsive to problems that are identified throughout the course of a year.

*Project is an Annual Program

Railroad Crossing Safety Improvements Program*

Public Works

Location: Citywide

District(s): Citywide Ward(s): Citywide

Contact: Anne Weber

Description: Program to install safety and surface improvements at approximately 70 at-grade railroad crossings throughout the City of St. Paul. The program includes improvements of warning signals, gate arms, and signing and striping at crossings with local, collector, and arterial streets. The program will also improve the at-grade street surfacing where needed. The overall goal is to improve safety and provide a smoother riding surface at railroad crossings throughout the City.

Justification: Mn/DOT has a railroad crossing safety improvement program in which local governments are required to contribute 10% of the total project cost. The City program is intended to provide a source of matching funds for projects constructed under the Mn/DOT program. A number of crossings in St. Paul qualify for the Mn/DOT railroad crossing safety improvement program.

Additionally, in the 1980's, the City improved the roadway surface at a number of railroad crossing by installing some rubberized crossing materials. Some of these crossings have reached the end of their useful life and need to be replaced. This program will provide the funding for railroad crossing improvements and roadway surface replacement.

*Project is an Annual Program

Randolph Avenue Bridge

Public Works

Location: Randolph Avenue east of Shepard Road

District(s): 09 Ward(s): 02

Contact: Anne Weber

- Description:

This project will replace the structurally deficient Randolph Avenue Bridge #7272 and roadway, including improvements for accessibility, pedestrian, and bicycle facilities. The bridge and roadway provide sole access to businesses, residents, and Xcel Energy power-generating plant on Randolph Avenue, a dead-end local route. CIB funding would also count towards local agency match financing to leverage Federal grant funds. To date, the City has been awarded \$0.5M in Federal IIJA (THUD) and \$8M in Federal Grants (BROS), and has requested \$2M in future-year state bridge bonds.
- Justification:

The bridge carries daily truck traffic, and repairs have been made over the years to address age-related deterioration. Historically those load restrictions have placed burden on businesses and affected their ability to perform daily operations. The bridge is load-restricted to vehicles in its current condition. Only a project of this magnitude will restore its capacity to carry common legal truck loads, and only reconstruction will satisfy track clearance requirements mandated by Union Pacific Railroad. The project additionally provides opportunities to collaborate with City Parks, neighbors and trail users to improve safety, comfort and aesthetics in the project area.

Rice Street - John Ireland to Pennsylvania

Public Works

Location: Rice Street from John Ireland to Pennsylvania

District(s): 07, 17 Ward(s): 01

Contact: Anne Weber

Description: Ramsey County and the City are working in partnership with the Capitol Area Architectural and Planning Board to design and construct a community-driven vision for Rice Street near the Minnesota state capitol.

Justification: This project will improve pedestrian, bicycle and vehicle safety as well as improve transit and multimodal operations. The project is being coordinated with the Metro Transit's METRO G Line project. The City will be responsible for a local match on this project.

Robert - Fillmore to Annapolis

Public Works

Location: Robert Street from Fillmore to Annapolis

District(s): 03 Ward(s): 02

Contact: Anne Weber

Description: Provide local funds to contribute to MnDOT's Robert Street Project.

Justification: MnDOT is planning a project on Robert Street from Fillmore to Annapolis. The City will be responsible for a local match on this project. The project will repair or replace the roadway pavement, replace sidewalks, improve safety, and will be coordinated with other infrastructure work planned along the corridor such as utility replacement and transit improvements.

Saint Paul Streets Paving Program*

Public Works

Location: Citywide

District(s): Citywide Ward(s): Citywide

Contact: Anne Weber

Description: Established to improve the structural condition, safety and rideability of the city's street system. This program, which replaces the Residential Street Vitality Program, includes all city streets, both residential and arterial. Projects are prioritized by Pavement Condition Index and Average Daily Traffic as the main criteria.

Justification: The Department of Public Works has completed its first report based on the Pavement Management System three year study. The Pavement Condition Index(PCI) for St. Paul's Arterial Street system presently averages 55 on a scale of 100. The City's Residential averages 70. Best Practices for street condition would be typically an average of 70. Public works has identified and ranked 86 arterial street segments with low PCIs that should be reconstructed or rehabilitated. The segments at the top of the list have PCI's below 20. This program is intended to bring the PCI of all city streets up towards 70 in the next 20 years.

Sidewalk Reconstruction Program*

Public Works

Location: Citywide

District(s): Citywide Ward(s): Citywide

Contact: Anne Weber

Description: Remove and replace existing sidewalk that is poor condition and/or presents a safety hazard for pedestrians.

Justification: The Sidewalk Reconstruction Program is needed in order to replace existing sidewalk throughout the city that has been identified as a safety concern. There are approximately 25,000 asphalt patches on sidewalks throughout the City. These asphalt patches are a temporary fix to tripping and safety hazards. Funding this program will allow Public Works to replace panels or segments of sidewalk that have been identified as a safety concern.

*Project is an Annual Program

Signalized Intersection Safety Improvements Program*

Public Works

Location: Citywide

District(s): Citywide Ward(s): Citywide

Contact: Anne Weber

Description: Administer, design, and construct new traffic signal systems when and where warranted throughout the City. Reconstruct existing traffic signal systems in order to improve safety and traffic flow.

Make minor changes to existing traffic signal systems in order to improve safety and traffic flow efficiency. Bring traffic signal systems into compliance with current design standards (i.e.. add left turn arrows, install overhead signal indications, install larger indications, etc.).

Make minor changes to roadway geometrics and/or signage in order to improve safety and traffic flow efficiency (i.e.. add exclusive left turn lanes, add crosswalks, add "No Right Turn On Red" signs, etc.).

Justification: This program will provide the Department of Public Works a funding source in order to improve safety and efficiency at signalized intersections throughout the City. This program will allow Public Works to be responsive and reactive when the need for signalization at an intersection becomes warranted and necessary. This program will allow older traffic signal installations to be upgraded and brought into compliance with current design standards. Minor modifications can be made to roadway geometrics and signage to make signalized intersections operate safer and more efficiently for pedestrians and motorists. The Department gets many requests throughout the year to improve safety and efficiency at signalized intersections. Funding this program allows some of those improvement requests to be implemented.

Safety and Inspections

Vacant & Hazardous Building Demolition

Safety and Inspections

Location: Citywide

District(s): Citywide Ward(s): Citywide

Contact: City Staff

Description: Funds from this program continue to be used to remove properties that have a blighting influence, especially in diverse and economically challenged communities, within the City of Saint Paul, MN. Funds are utilized only on properties where existing ownership has failed to remove properties voluntarily.

Justification: Funding will be used to support a citywide, multi-year program which provides resources to remove vacant nuisance properties which pose a threat to public health and safety. Vacant structures historically have been a negative influence on neighborhoods, which creates disinvestment and crime in the community. By providing CDBG funding to remove these properties, the City is able to remove many more structures than if it used limited internal resources
