We are providing important information regarding the water service line that supplies water to your property. **The service line material at your address is either made of lead or is suspected as lead.** We are treating it as lead until otherwise verified. If your service line is lead, your property qualifies for a free replacement through the Lead Free Saint Paul Regional Water Services (SPRWS) program.

The Lead Free SPRWS program is a 10-year initiative to replace all lead water service lines within the SPRWS service area at no cost to property owners. Your property is eligible for this free replacement during the 2026 construction season. We strongly encourage you to take advantage of this opportunity by completing the intent form online today!

We are committed to removing lead service lines because lead in drinking water poses health risks if ingested. To protect against potential lead exposure, it is essential to eliminate all sources of lead from service lines and indoor plumbing.

Please note that free replacement services are based on available funding. If you choose to decline the replacement at this time, future assistance may not be guaranteed. SPRWS remains dedicated to enhancing our system and will be replacing lead service lines located in the street right-of-way.

To participate in the lead service line replacement, please complete the intent form online today at stpaul.gov/ServiceMaterialMap →

Your Action Is Required

The service line at your address is suspected to be **LEAD**

Sign-up **NOW** to replace your lead lines for **FREE**

For more information about lead and household water visit stpaul.gov/lead-free or contact us directly by phone or email with questions you may have about this program.

Para más información, póngase en contacto con el equipo de SPRWS "Libre de Plomo" en el 651-266-6820. Se le facilitará un traductor.
