

Kellogg Boulevard Phase 2 Construction Schedule Update

From August 2025 to Fall 2026, Phase 2 of the Capital City Bikeway project, which includes the addition of a new two-way separated bikeway, sidewalk, westbound roadway, and center medians will begin. The project will also include improvements to drainage, underground utilities, traffic signals, lighting, and landscaping amenities.

The 2026 project work will be divided in two stages:

- **Stage 1** (Spring - Summer 2026): Westbound Kellogg Blvd will be closed between Wabasha St. & Washington St.
 - **Stage 2** (Spring - Fall 2026): Westbound Kellogg Blvd will be closed between Washington Street & 7th Street W
- *During Spring - Summer 2026, both Stage 1 and Stage 2 closures will overlap, meaning Westbound Kellogg Blvd from Wabasha St. to 7th St. W will be closed.*

Please note that Xcel Energy will have westbound lane closures in the same area from August 2025 through April 2026 for utility work. These are expected to recommence in January 2026. Thank you for your patience as both efforts work to improve our infrastructure. Please follow posted detour signage. Access will be maintained for those wishing to access a property directly within the project area.

If you have specific concerns or technical/construction questions, contact the Construction Project Representative, Shawn Hennen at 651-368-3626 or shawn.hennen@bolton-menk.com.

Stage 1

Spring - Summer 2026: Utility, Roadway, and Trail Construction

Stage 2

Spring - Fall 2026: Utility, Roadway, and Trail Construction

Westbound Detour

Open to traffic
