ACCESS During Construction

Underground Utilities

UTILITY COORDINATION

Private Utilities will do some relocation work this winter prior to the City project starting in May of 2027.

Investigative Pot-holing to determine exact location and depth of some underground utilities may occur prior to start date.

AREAWAYS

AREAWAYS

STREET LIGHTING

PROPOSED STREET LIGHTING

Trees

- Trees will be planted in the boulevard where there are no utility conflicts.
- Paver planters in Stockholm Soil are the City standard for planting trees downtown.
- Flat paver planters allow for more pedestrian space and leave room for parking stations, streetlights and signage.

MODULAR WETLANDS

Modular Wetlands are precast, concrete structures that filter rainwater run-off before releasing into the storm sewer system.

Assessments

General Project Assessment Information

- Street reconstruction projects are funded by:
  - City street reconstruction bonds
  - Assessments to abutting property owners
  - Federal and State Funding

- The estimated assessment project rate has not yet been determined and will be determined before the project starts

- Property owners are assessed after the construction project is complete

- View information about and pay assessments at www.stpaul.gov/assessments
